About Khulna Technologies Ltd.

Khulna Technologies Ltd. is a U.S.-based software and digital marketing agency. Our team collaborates with international clients, including leading U.S. law firms and businesses, to deliver innovative software solutions, digital services, automation, and AI-powered workflows.

We believe Artificial Intelligence is transforming how businesses operate, and we are looking for someone passionate about exploring, learning, implementing, and teaching AI across the organization.

About the Role

We are looking for an enthusiastic, self-motivated, and fast-learning AI Development Executive to lead AI adoption across our organization.

This is **not a software developer position**.

Your primary responsibility will be to stay updated with the latest AI technologies, identify practical AI use cases, help employees effectively use AI in their daily work, provide AI training, develop prompt libraries, research new AI solutions, and continuously improve business processes through AI.

You should enjoy learning new technologies, experimenting with AI tools, simplifying complex concepts, and helping others become more productive with AI.

Key Responsibilities

AI Research & Innovation

- Stay updated with the latest AI tools, models, technologies, and industry trends.
- Research newly released AI platforms, products, and features.
- Evaluate AI tools and recommend suitable solutions for business needs.
- Test and compare different AI models, platforms, and workflows.
- Research AI best practices, productivity techniques, and automation opportunities.

AI Adoption & Employee Support

- Help employees effectively use AI tools in their daily work.
- Identify repetitive business processes that can be improved using AI.
- Recommend department-specific AI workflows and solutions.
- Create prompt libraries, AI templates, and reusable workflows.
- Provide one-on-one AI support whenever employees require assistance.
- Continuously collect employee feedback and improve AI usage across the company.

Training & Knowledge Sharing

- Conduct AI training sessions for different departments.
- Explain AI concepts in simple language for non-technical employees.
- Prepare AI documentation, user guides, tutorials, and knowledge base articles.
- Create internal AI learning materials and best practice guides.
- Introduce employees to newly released AI features and tools.

AI Workflow & Automation

- Design AI-assisted workflows to improve productivity.

- Research automation opportunities using AI platforms.
- Assist departments in integrating AI into existing business processes.
- Work closely with management to identify high-impact AI initiatives.

Reporting

- Prepare weekly and monthly AI research reports.
- Report newly discovered AI tools and their business value.
- Track AI adoption across departments.
- Measure productivity improvements through AI implementation.

Required Qualifications

- Excellent English communication skills (Speaking, Listening, Reading & Writing).
- Strong Bengali communication and teaching ability.
- Strong research and analytical skills.
- Passion for Artificial Intelligence and emerging technologies.
- Ability to learn new AI tools quickly and independently.
- Excellent presentation skills.
- Ability to explain technical concepts to non-technical audiences.
- Strong problem-solving ability.
- Ability to conduct online research efficiently.
- Experience using ChatGPT and other modern AI tools.
- Strong organizational and documentation skills.
- Ability to work independently with minimal supervision.

Preferred Skills

Experience with one or more of these platforms: ChatGPT, Claude, Gemini, Perplexity, Microsoft Copilot, NotebookLM, or Grok.

Basic understanding of any of the following is a plus:

- Prompt Engineering

- AI Agents
- RAG (Retrieval-Augmented Generation)
- MCP (Model Context Protocol)
- AI automation platforms (n8n, Zapier, Make)
- AI-assisted content creation and productivity workflows
- APIs and no-code automation tools

Experience creating prompts, training materials, SOPs, knowledge bases, or documentation is also valued.

Educational Requirements

Bachelor's or Master's degree in:

- Computer Science
- Software Engineering
- Information Technology
- Artificial Intelligence
- Business Administration
- Management Information Systems (MIS)
- English
- Marketing
- Or any relevant discipline

Candidates from other educational backgrounds with exceptional AI knowledge, strong communication skills, and a passion for learning are highly encouraged to apply.

What We Expect

- Strong curiosity and passion for Artificial Intelligence.
- Continuous learning mindset.
- Excellent communication and teaching skills.
- Strong English comprehension.
- Ability to learn from English videos, articles, and documentation.
- Ability to explain AI concepts in both English and Bengali.

- Business-oriented thinking.
- Strong research habit.
- Initiative to experiment with new AI tools.
- High level of ownership and responsibility.
- Attention to detail.
- Positive attitude and willingness to help others.
- Ability to work independently.
- Commitment to continuous improvement.
- Ability to identify practical AI opportunities that create measurable business value.
