APON Industries Ltd.

Electrician - Process Manufacturing

Requirements

Education

- Diploma in Electrical
- Bachelor in Engineering (BEngg)

Experience

At least 1 year

Additional Requirements

- Age At least 20 years

Responsibilities & Context

- Install, maintain, troubleshoot, and repair electrical systems, wiring, and equipment throughout the plastics manufacturing facility.
- Service and repair injection molding machines, extruders, and other production equipment, including motors, drives, heaters, and control systems.
- Read and interpret electrical schematics, blueprints, and technical diagrams to diagnose and resolve faults.
- Perform preventive and predictive maintenance on electrical components to minimize equipment downtime and production interruptions.
- Install, program, and troubleshoot PLCs (Programmable Logic Controllers), sensors, and automated control systems used in production lines.
- Inspect and test electrical systems and components using multimeters, meggers, and other diagnostic tools to ensure proper operation.
- Wire and connect single-phase and three-phase motors, control panels, transformers, and distribution equipment.
- Respond promptly to electrical breakdowns and emergencies to restore production as quickly and safely as possible.
- Ensure all electrical work complies with the National Electrical Code (NEC), local codes, and company safety standards.
- Follow lockout/tagout (LOTO) procedures and all applicable OSHA and workplace safety regulations.
- Maintain accurate records of maintenance activities, repairs, parts used, and inspections.

- Identify and recommend upgrades or improvements to electrical systems and equipment for better efficiency and reliability.
- Support the installation and commissioning of new machinery and equipment.
- Maintain an inventory of electrical parts, tools, and supplies, and request replacements as needed.
- Collaborate with maintenance, production, and engineering teams to support overall plant operations.
