RACO

Frontend Developer

Requirements

Education

- Bachelor’s Degree in Computer Science, Software Engineering, or a related field

Additional Requirements

- Age At least 18 years

A strong frontend and Figma portfolio is highly valued.

Mandatory Skills

- Strong expertise in Figma (Auto Layout, components, variants, and design systems).
- Strong experience with React.js and Next.js.
- Excellent command of HTML5, CSS3, and modern styling approaches (Tailwind CSS/Bootstrap CSS/ CSS Modules).
- Solid understanding of JavaScript (ES6+).
- Strong understanding of UI/UX principles, user flows, and interaction design.
- Hands-on experience with API integration (REST APIs, async data handling and more).
- Ability to translate high-level direction into clear ui design.
- Comfortable working in a team that values accountability and quality over speed alone.
- Familiarity with Git and collaborative development workflows.

Responsibilities & Context

Join RacoAI as a Frontend Engineer

About RacoAI

At Raco AI, we build AI-driven products that help businesses understand and utilize their data more intelligently. We are intentional about how we build prioritizing clarity, long-term thinking, and engineering discipline over shortcuts. We operate with a high level of trust, accountability, and

respect. Our teams work in a cross-functional environment where engineering, AI, product, and operations collaborate closely. We believe great products are built by people who care deeply about quality, ethics, and ownership.

Role Overview

We are looking for a Frontend Engineer with strong expertise in Figma and modern frontend development. This role is fully focused on frontend engineering and UI/UX design, there are no backend or AI development responsibilities. You will work closely with the Team Lead and COO, as well as a cross-functional AI team, to clearly understand product goals from a high-level perspective, define user flows, and implement frontend solutions that meet both product and engineering standards. This role is suited for someone who takes pride in their work, values clear communication, and holds themselves to a high bar. We are looking for someone who wants to be excellent not by title, but by execution.

Key Responsibilities

- Develop a clear understanding of product requirements, system behavior, and user journeys from a high-level business and technical viewpoint.
- Collaborate closely with cross-functional AI, product, and engineering teams with professionalism and mutual respect.
- Design user flows, wireframes, and high-fidelity interfaces using Figma, maintaining usability, consistency, and simplicity.
- Translate approved Figma designs into pixel-accurate, responsive, and maintainable frontend implementations.
- Develop and maintain frontend applications using React.js / Next.js.
- Integrate frontend applications with backend and AI-powered APIs, handling data flow, loading states, and edge cases responsibly.
- Build scalable, reusable UI components that can grow with the product.
- Ensure frontend quality through attention to performance, accessibility, and user experience.
- Communicate in a professional, ethical, and respectful manner at all times.
- Participate in design reviews, sprint planning, and frontend architecture discussions with a solutions-oriented mindset.
