Requirements

Education

- Bachelor of Science (BSc) in Computer Science & Engineering, Computer Science

Experience

2 to 4 years

- The applicants should have experience in the following business area(s): IT Enabled Service, Software Company

Additional Requirements

- Age 27 to 35 years
- Only Male

Experience Requirements

2-4 years of experience in one or more of the following:

Recruitment coordination

IT staffing support

Administrative operations

Outsourcing/BPO operations

HR coordination

Candidate sourcing

Vendor coordination

Project coordination

Hands-on exposure to how staff augmentation companies operate end-to-end strongly preferred

Familiarity with Bangladesh-based tech talent pools and sourcing pipelines is a plus

Reference companies for the type of experience we value: Brain Station 23, Vivasoft, DSI, or similar Bangladesh-based tech staffing/operations firms

Skills Required

Talent Acquisition, Resource Matching, Candidate Sourcing, Technical Screening, Resource Training & Onboarding, Rate Negotiation, SOP Development, Talent Bench Management, Client Relationship Management, Escalation Handling, Delivery Operations, Billing Transparency, Process Optimization, Team Leadership, CRM & Project Management Tools

Must-Have

Fluent English communication (written and spoken) for client interaction

Strong understanding of staff augmentation models (especially US market dynamics)

Advanced sourcing skills (LinkedIn Recruiter, Boolean search, GitHub, Stack Overflow)

Hands-on technical understanding (coding basics, frameworks, system design)

Strong ownership of delivery outcomes and client satisfaction

Process-driven mindset with the ability to build scalable systems

Strong negotiation skills with clients and vendors

Comfortable with pricing, margins, and utilization metrics

Proactive, self-managed, and execution-focused approach

Long-term mindset and commitment to operational excellence

Open to feedback and fast execution of improvements

Responsibilities & Context

About the Role

We are a fast-growing IT service provider specializing in outsourced operations, talent augmentation, and specialized service delivery across multiple industries. Our mission is to scale operations across concurrent business streams while maintaining exceptional service quality and client satisfaction. We work with leading companies and startups to deliver reliable, scalable solutions. Our team thrives on operational excellence, innovation, and collaborative problem-solving. We are looking for detail-oriented professionals who can help us build scalable systems and drive our rapid growth.

Job Responsibilities

- Own end-to-end delivery operations across active client engagements, including daily coordination, status reporting, and proactive escalation management
- Lead technical talent acquisition by sourcing and engaging candidates (including passive talent) via LinkedIn Recruiter, job boards, GitHub, Stack Overflow, engineering communities, and advanced Boolean search
- Conduct initial technical screening covering coding fundamentals, frameworks, and system design; validate candidate profiles using GitHub, portfolios, and open-source contributions
- Negotiate resource rates and engagement terms with clients on behalf of the organization
- Manage the full delivery lifecycle, including SOW finalization, team formation, kickoff, sprint onboarding, execution, and post-delivery support
- Train, onboard, and upskill new resources through structured shadowing, daily check-ins, and continuous quality assurance
- Develop and maintain operational SOPs, onboarding workflows, and resource management playbooks
- Build and maintain a pre-screened talent bench (e.g. Full Stack, DevOps, AI Engineer/ML), ensuring ongoing engagement and readiness through monthly check-ins, with at least two backup candidates per role for each active engagement
- Act as the primary escalation point for client issues, taking full ownership of resolution end-to-end

- Coordinate with Business Development to ensure smooth transition from deal closure to team mobilization within 10 business days, while also supporting BD by engaging vendors, MSPs, and clients to generate new requirements
- Track and report key operational metrics, including utilization, KPIs, SLA adherence, and billing accuracy across engagements
- Monitor industry trends, salary benchmarks, and talent availability, and translate insights into actionable recommendations
- Mentor recruiters as the team scales, while actively contributing to requisition fulfillment
- Identify operational inefficiencies and drive process improvements aligned with client expectations and organizational growth
