Babylon Resources Limited

Lead / Senior Full MERN Stack Software Engineer

Requirements

Education

- Bachelor of Science (BSc) in Computer Science Engineering from a reputed university.

Experience

At least 25 years

- The applicants should have experience in the following business area(s): Software Company

Additional Requirements

- Age 28 to 45 years
- Expert knowledge of the MERN stack (MongoDB, Express.js, React.js, Node.js) and its core principles.
- Proficient in modern JavaScript (ES6+), TypeScript, HTML5, and CSS3.
- Strong experience with state management (Redux, Context API) and backend architecture (RESTful APIs, microservices).
- Experience with version control systems (e.g., Git) and modern DevOps practices (Docker, AWS/GCP).
- Strong understanding of system design, database scaling, web standards, and security best practices.
- At least 7 years of relevant professional experience, with a strong background in leading MERN stack projects.

Responsibilities & Context

We are seeking a highly skilled and experienced Lead / Senior Full Stack MERN Engineer to join our dynamic team. As a Lead MERN Engineer, you will be responsible for architecting, developing, and maintaining high-performance web applications using MongoDB, Express.js, React.js, and Node.js, while ensuring scalability, security, and providing technical leadership to the development team.

- Lead the architecture, design, and development of scalable web applications using the MERN stack.
- Collaborate with product, design, and QA teams to translate complex requirements into robust technical solutions.
- Architect and optimize database schemas, indexing, and complex queries in MongoDB.
- Optimize overall system performance, ensuring high availability, fast load times, and seamless user experiences.
- Implement robust security best practices to safeguard applications and APIs against vulnerabilities.
- Oversee cloud deployments, CI/CD pipelines, and regular system maintenance.
- Work closely with cross-functional teams, seamlessly bridging the gap between front-end and back-end development.
- Provide technical leadership, guidance, and mentorship to mid-level and junior developers.
- Conduct thorough code reviews to maintain code quality, system integrity, and adherence to best practices.
- Implement, enforce, and continuously improve coding standards and engineering processes.
- Identify, troubleshoot, and resolve complex architectural issues, bugs, and performance bottlenecks promptly.
- Provide high-level technical support to resolve critical system-related problems.
- Stay informed about the latest trends, tools, and technologies in the JavaScript ecosystem and cloud architecture.
- Continuously enhance team capabilities and update skills to stay competitive in the field.
