Responsibilities & Context

National Development Programme (NDP) is a national level, non-government, non-profit development organization established in 1992, dedicated to improving livelihoods, promoting human

rights, gender equality, sustainable development, and inclusive growth throughout Bangladesh. NDP implements wide-ranging programs in Education, Health, Agriculture, Housing, and Credit Support Programme in collaboration with partners including Palli Karma-Sahayak Foundation (PKSF) and various national & international development stakeholders.

Job Context: NDP Agro Farm, a concern of National Development Programme (NDP), is looking for a dynamic, experienced, and result-oriented professional for the position of Manager (Livestock & Farm) to oversee livestock operations and ensure efficient farm management.

Key Responsibilities:

Livestock Health Management

- Monitor the health status of livestock and ensure timely diagnosis and treatment in consultation with veterinarians.
- Plan and implement vaccination, deworming, disease prevention, and biosecurity programs.
- Ensure animal welfare in accordance with modern livestock management practices.

Breeding and Reproductive Management

- Supervise artificial insemination (AI) and breeding activities.
- Monitor reproductive performance and maintain breeding records.
- Implement herd improvement programs to enhance productivity.

Feed and Nutrition Management

- Prepare balanced feeding plans according to age, weight, and production requirements.
- Ensure quality control, procurement, storage, and efficient utilization of feed, fodder, silage, and supplements.
- Monitor feed conversion efficiency and minimize wastage.

Farm Operations

- Plan, organize, and supervise all daily farm activities.
- Ensure proper cleanliness, sanitation, ventilation, and maintenance of livestock housing.
- Maintain strict biosecurity measures to minimize disease risks.

Production Management

- Monitor daily milk and livestock production.
- Analyze production performance and implement strategies for continuous improvement.
- Ensure quality standards for all farm products.

Marketing and Business Development

- Coordinate the marketing and sales of livestock, milk, and other farm products.
- Build and maintain relationships with customers, suppliers, and business partners.
- Explore opportunities to improve profitability and operational efficiency.

Human Resource & Financial Management

- Supervise farm employees, assign duties, monitor, and provide necessary training.
- Prepare and manage farm budgets, operational costs, and financial records.
- Ensure effective utilization of farm resources to maximize profitability.

Record Keeping and Reporting

- Maintain complete records of livestock health, vaccination, breeding, production, mortality, medicine usage, and inventory.
- Prepare weekly, monthly, and annual operational reports for management.
- Utilize digital record-keeping systems where applicable.
- Perform any other duties assigned by the higher authority.
