Manager / Senior Manager : System Auditor / IT Auditor - Group Internal Control & Compliance

Requirements

Education

- Bachelor/Honors

Experience

At least 7 years

- The applicants should have experience in the following business area(s): Banks

Additional Requirements

- Experience on System Audit / IT Audit
- Professional certifications such as CISA, CISSP, CISM, ISO 27001 Lead Auditor/Implementer, CPISI, or other relevant certifications will be considered an added advantage.
- Strong analytical and data interpretation skills, with the ability to identify trends, anomalies, and control weaknesses through data analysis.
- Excellent report writing, documentation, and presentation skills with the ability to communicate audit findings and recommendations effectively.
- Sound understanding of information systems, IT controls, cybersecurity, and risk management principles.
- Strong interpersonal, communication, and stakeholder management skills.

Responsibilities & Context

- Lead and oversee the execution of **System Audits, Information Technology (IT) Audits, and General Banking Audits** across branches, divisions, departments, and business units in accordance with the approved Annual Audit Plan, ensuring compliance with professional audit standards and regulatory requirements.
- Plan, supervise, and review audit engagements, ensuring the timely preparation and submission of comprehensive audit reports with well-supported findings, risk assessments, practical recommendations, and executive summaries for senior management and the competent authority.
- Lead special audits, investigations, fraud reviews, and management-assigned assignments, providing independent assessments and actionable recommendations to mitigate operational, financial, and technology-related risks.

- Drive the adoption of modern audit methodologies by leveraging data analytics, continuous auditing techniques, and technology-enabled audit tools to enhance audit coverage, efficiency, and overall effectiveness.
- Evaluate the adequacy and effectiveness of internal controls, IT governance, cybersecurity controls, regulatory compliance, and enterprise risk management frameworks, identifying control gaps and recommending sustainable risk mitigation measures.
- Monitor and validate the implementation of agreed audit recommendations through structured follow-up reviews, ensuring timely resolution of audit findings and reporting the status of significant issues to senior management and relevant committees.
- Collaborate with business and technology stakeholders to promote a strong governance, risk management, and compliance culture while maintaining the independence and objectivity of the internal audit function.
- Support the Head of Group Internal Control & Compliance in developing risk-based audit strategies, strengthening the internal control environment, and implementing continuous improvements to audit processes and methodologies.
- Perform any other responsibilities or strategic assignments related to internal audit, IT audit, risk management, governance, and compliance as assigned by management from time to time.
