## Responsibilities & Context

This role focuses on leading and strengthening research within TLMI-B by building organizational capacity and fostering a strong research culture. It involves integrating research into core activities, developing partnerships, and ensuring effective dissemination of findings. The position also emphasizes translating research into practical policies, programs, and advocacy efforts. Additionally, it supports clinical, operational, and social research initiatives, oversees data management, and coordinates, monitors, and supervises research projects while aligning with global research efforts.

KEY RESPONSIBILITIES:

- Promote an integrated approach to strategic planning, leading in the area of Research and Development work plans in line with The Leprosy Mission's Country Strategy for Bangladesh
- Develop an effective and supportive working relationship with other TLMI-B National Leads (Healthcare; Inclusive Development; and Advocacy) to ensure cohesive planning, assess programme implications, and enable timely and effective responses.
- Ensure research policies, protocols, practices and project cycle management for all research programmes are developed, maintained, and implemented according to TLM standards.
- Oversee and coordinate all research activities (clinical, operational, and social), including effective execution of the Leprosy Field Research Program (LepFiRe) in Bangladesh.
- Lead the identification, development, implementation, and dissemination of research to inform practice and evidence-based solutions.
- Manage and supervise the research team to ensure strong performance, productivity, and progress monitoring.
- Identify programmatic knowledge gaps, develop research proposals, secure funding, and publish findings in peer-reviewed journals.
- Submit high-quality, timely reports to research donors in coordination with accountable persons.
- Lead the knowledge systems and processes to capture, document, and disseminate research learning, while fostering continuous learning and promoting the adoption of innovative practices across programmes.
- Ensure budgetary control related to research through regular supervision.
