Responsibilities & Context

- 1. Position Purpose
- The Project & Knowledge Management Officer supports the Office of MD & Strategic Affairs in strengthening organizational capability through information organization, knowledge management, project coordination, and execution follow-up.
- The role is responsible for transforming information, experiences, and project learnings into organizational knowledge, management tools, dashboards, and actionable plans to support long-term industrial development and future platform growth.
- 2. Position Summary
- Support organizational growth through:
- Information organization
- Knowledge management
- Project coordination
- Dashboard management
- Execution support
- Position Definition: Turn information into knowledge. Turn knowledge into execution. Turn execution into organizational capability.
- 3. Key Responsibilities
- 3.1 Information Organization & Management
- Organize, classify, maintain, and update industrial development information, government policy and regulatory information, project and partnership information, manufacturing and operational information, market and industry information, and business-related information.
- Establish and maintain databases, information repositories, project archives, management dashboards, and knowledge repositories. Transform fragmented information into

management reports, project documentation, management tools, and organizational knowledge assets.

- 3.2 Knowledge Management & Documentation
- Prepare meeting minutes, bilingual reports and presentations, project documentation and filing, knowledge repositories, AI-assisted knowledge management systems, project review documentation, and management policies/documentation.
- Transform project experiences into SOPs, methodologies, management tools, and reusable organizational knowledge.
- 3.3 Project Coordination & Follow-up
- Support the Managing Director and the Director of Industry Development & Strategic Affairs in strategic projects, industrial development projects, government and compliance matters, new company and new project development, cross-functional initiatives, and management improvement projects.
- Responsible for action tracking, timeline management, project status updates, project documentation, and project reporting.
- 3.4 Dashboard & Management Reporting
- Develop and maintain project dashboards, business dashboards, management dashboards, weekly reports, monthly reports, and executive reports.
- 3.5 Manufacturing Information & Knowledge Management
- Support the organization and accumulation of product knowledge, production process knowledge, quality cases and lessons learned, training materials, SOPs, technical know-how, manufacturing databases, project reviews, and R&D/process improvement experience.
