Civil Tech Consultant

Structural Engineer

Requirements

Education

- Bachelor in Engineering (BEngg) in Civil Engineering

Experience

2 to 5 years

- The applicants should have experience in the following business area(s): Architecture Firm, Engineering Firms

Additional Requirements

- Age 22 to 40 years
- Required Experience
  - Must be a Member of the Institute of Engineers, Bangladesh (IEB)
  - Candidates with 1–5 years of experience in structural design consultancy will receive preference.
  - Experience in RCC and steel structure design for residential, commercial, industrial, institutional, or government projects is highly desirable.
  - Experience in structural assessment, retrofitting, and design review will be an added advantage.
- Required Technical Skills
  Applicants should have strong proficiency in:
  - ETABS
  - SAFE
  - AutoCAD
  - Microsoft Excel
  - Microsoft Word
  - Microsoft PowerPoint
- Preferred Software Knowledge:
  - STAAD.Pro
  - SAP2000
  - Autodesk Revit (Structure)
  - Tekla Structures (Preferred)
- Technical Competencies:
  - RCC Structural Design
  - Steel Structure Design
  - Structural Analysis

        - Foundation Design
        - Seismic Analysis
        - Wind Load Analysis
        - Structural Detailing
        - Structural Assessment
        - Building Retrofitting
        - Quantity Estimation
        - BOQ Preparation
        - Engineering Calculations
        - Design Review
        - Technical Report Writing
        - BNBC Compliance
        - ACI Code Application
- Soft Skills
  The ideal candidate should demonstrate:
    - Strong analytical and engineering judgment
    - Excellent problem-solving ability
    - Effective communication skills
    - Attention to detail
    - Team collaboration
    - Time management
    - Technical report writing
    - Client coordination
    - Presentation skills
    - Commitment to quality and accuracy
    - Professional ethics and integrity
    - Ability to work under project deadlines
- Preferred Candidate Profile
  We are seeking a motivated Structural Engineer with a solid understanding of structural behavior, engineering principles, and design standards. The ideal candidate is passionate about delivering safe, economical, and practical structural solutions, possesses strong analytical skills, and enjoys working collaboratively within multidisciplinary project teams. Candidates who are eager to expand their expertise in structural design, government consultancy, and building assessment will thrive in this role.

Responsibilities & Context

Civil Tech Consultant is looking for a skilled and analytical **Structural Engineer** to join our Structural Design Department. The selected candidate will be responsible for the structural analysis, design, detailing, and review of reinforced concrete and steel structures, ensuring compliance with BNBC and international engineering standards.

This position offers the opportunity to work on residential, commercial, industrial, institutional, and government infrastructure projects while collaborating with multidisciplinary engineering teams and contributing to technically challenging assignments.

Key Responsibilities

- Perform structural analysis and design of RCC and steel structures.
- Prepare structural calculation reports, design notes, and engineering documentation.
- Develop structural drawings, reinforcement details, and construction documentation.
- Design foundations, columns, beams, slabs, retaining walls, and other structural components.
- Review architectural drawings and coordinate structural requirements.
- Coordinate with architects, MEP engineers, geotechnical engineers, and project managers.
- Ensure designs comply with BNBC, ACI, ASTM, and other relevant standards.
- Review shop drawings and respond to contractor technical queries.
- Conduct structural assessments and prepare retrofitting recommendations where required.
- Participate in site inspections to verify structural compliance and construction quality.
- Assist in preparing BOQs and technical specifications.
- Support feasibility studies and value engineering exercises.
- Prepare structural design reports for client submissions and regulatory approvals.
- Resolve structural design issues during project execution.
- Maintain proper documentation and revision control for all structural deliverables.
- Meet project deadlines while maintaining high engineering standards.
