AI Data Translator (Canadian French) – Remote

Job description

Location:
Remote (Canada)

Job Type:
Contract / Full-Time (Based on Project Requirements)
Start Date:
ASAP

About the Role

We are seeking detail-oriented and motivated
AI Data Annotators (Canadian French)
to support the development and enhancement of advanced AI-powered conversational systems. In this role, you will review, evaluate, and validate AI-generated content to help improve accuracy, quality, and overall user experience.

This opportunity is open to both entry-level and experienced professionals. Comprehensive paid training will be provided to ensure success in the role.

Key Responsibilities
• Review and verify data to support AI model training and improvement.
• Evaluate AI-generated responses for quality, accuracy, relevance, and consistency.
• Follow project guidelines, annotation standards, and quality requirements.
• Identify errors, inconsistencies, and improvement opportunities in AI-generated content.
• Provide clear feedback and recommendations to enhance model performance.
• Complete assigned tasks accurately and within established deadlines.
• Maintain high levels of productivity and quality while working remotely.
• Collaborate with project teams and participate in training sessions as needed.

Required Qualifications
FR_CA Data Annotator
• Native French speaker with strong English proficiency.

• Excellent written and verbal communication skills in both French and English.
• Strong spelling, grammar, and attention to detail in both languages

Preferred Qualifications
• Previous experience in data annotation, content moderation, quality assurance, transcription, or AI training projects.
• Experience reviewing written content for grammar, clarity, and accuracy.
• Familiarity with Generative AI, Large Language Models (LLMs), or conversational AI tools.
• Strong problem-solving and critical-thinking abilities.

What We Offer
• Fully remote work opportunity.
• Paid training and onboarding.
• Opportunity to contribute to cutting-edge AI and machine learning projects.
• Flexible work environment.
• Collaborative and supportive team culture.
• Valuable experience in the rapidly growing AI industry.
