Digital Program Specialist – Data Analytics

Job Description

The Digital Program Specialist – Data Analytics plays a key role in turning business needs into trusted, high-quality data that supports smarter decision-making across AIIB. 📊 Working closely with business teams and data engineers, you will define KPIs, align reporting standards, improve data quality, and ensure consistency across systems and departments. You'll help shape scalable data solutions, support executive reporting, coordinate testing and system enhancements, resolve complex data challenges, and contribute to strong data governance. 💡 We're looking for someone with 5–8 years of experience in data analytics or business analysis, strong knowledge of data modelling and governance, experience working across business and technology teams, and familiarity with tools such as SQL, Power BI, and Python. If you enjoy solving complex problems, collaborating with diverse stakeholders, and helping build a data-driven organisation that delivers sustainable infrastructure across Asia and beyond, we'd love to hear from you. 🌏🚀
