TELECOMMUNICATIONS ENGINEER

Job Description
As a Telecommunications Engineer at the United Nations, you'll be part of the Department of Management, focusing on the design, installation, and maintenance of various telecommunications systems for both central operations and field missions. Your role involves drafting specifications, supporting procurement, establishing performance standards, providing emergency communication capabilities, and planning rapid communication setups. You'll collaborate with other UN agencies and supervise technical staff while ensuring high-quality service and operational performance. A Master's degree in a related field and a minimum of five years of experience in telecommunications are required. Join us to help enhance communication infrastructure that supports global missions! 🌍📡🤝

THE UNITED NATIONS DOES NOT CHARGE A FEE AT ANY STAGE OF THE RECRUITMENT PROCESS (APPLICATION, INTERVIEW MEETING, PROCESSING, OR TRAINING). THE UNITED NATIONS DOES NOT CONCERN ITSELF WITH INFORMATION ON APPLICANTS' BANK ACCOUNTS.
