About The Company

U.S. Renal Care is a leading provider of outpatient dialysis services dedicated to delivering high-quality, compassionate care to patients with chronic kidney disease. With a network of state-of-the-art clinics across the country, the company is committed to improving patient outcomes through innovative treatment options, personalized care plans, and a focus on continuous quality improvement. U.S. Renal Care prides itself on fostering a collaborative and supportive work environment that promotes professional growth and excellence in patient care.

About The Role

The Administrator at U.S. Renal Care plays a pivotal role in managing the daily operations of the dialysis clinic, ensuring compliance with all regulatory standards, and maintaining high-quality patient care. This leadership position involves overseeing clinical and administrative functions, coordinating staff, and fostering partnerships within the healthcare community. The Administrator reports directly to regional operational management, such as the Area Director, Regional Director, or Vice President of Operations, depending on the location. The role requires a strategic thinker with strong organizational skills, capable of handling emergent situations with sound judgment while maintaining a focus on operational excellence and patient satisfaction.

Qualifications

To succeed in this role, candidates must demonstrate leadership capabilities and possess the ability to perform under various circumstances with sound judgment. Essential qualifications include strong analytical and problem-solving skills, excellent time management, and organizational abilities. Prior experience in dialysis management is preferred, with at least one year of relevant experience. Candidates should have a working knowledge of the English language, both verbal and written, and be proficient in Microsoft Office applications, including Word, Excel, and Outlook. Familiarity with USRC clinical applications is required within 90 days of hire. Additionally, candidates must meet state-specific licensing and practice requirements. For roles involving nursing supervision, a current RN license, at least 18 months of nursing experience, including six months in kidney failure care, and CPR certification are mandatory.

Responsibilities

The Administrator is responsible for leading all aspects of clinic operations, including growth development, quality management, compliance, and staff development. Key duties include developing and implementing processes for program expansion aligned with company goals, managing patient scheduling, and ensuring effective staffing levels. The role involves overseeing clinical and operational processes to enhance patient health outcomes, reduce hospitalizations, and minimize missed treatments. The Administrator reviews incident reports, promotes quality improvement initiatives, and leads Quality Assessment & Performance Improvement (QAPI) meetings to ensure continuous quality enhancement.

Operational readiness is a critical aspect, requiring knowledge of federal, state, and local laws, regulations, and healthcare practice acts. The Administrator ensures clinic compliance, manages corrective action plans, and maintains certification standards. Responsibilities extend to supervising the maintenance of equipment, ensuring a safe and sanitary environment, and managing inventory levels. Building strong partnerships with medical staff, hospitals, vendors, and the community is vital for fostering a collaborative environment and promoting guest customer service standards.

Staff development and retention are central to this role. The Administrator recruits, trains, evaluates, and manages personnel, ensuring all team members meet qualification standards and perform duties within legal and organizational guidelines. Effective communication of expectations, performance management, and fostering a team-oriented culture are essential. The role also involves participating in meetings with governing bodies, medical directors, and staff to ensure operational and clinical excellence.

Benefits

U.S. Renal Care offers comprehensive benefits packages for full-time employees, including medical, pharmacy, dental, vision, and voluntary benefits. Employees are also eligible for a 401(k) plan with employer matching, virtual care services, life insurance, paid time off (PTO), and additional voluntary benefits. Part-time employees benefit from a 401(k) plan with employer match and PTO, supporting work-life balance and financial security.

Equal Opportunity

U.S. Renal Care is an equal opportunity employer committed to diversity and inclusion in the workplace. We do not discriminate based on race, color, religion, gender, sexual orientation, gender identity or expression, age, national origin, disability, or any other protected class. We believe in creating an inclusive environment where all employees can thrive and contribute to our mission of providing exceptional patient care.
