Associate Designer

Brno, South Moravia, Czechia

At ABB, we help industries run leaner and cleaner—and every person here makes that happen. You'll be empowered to lead, supported to grow, and proud of the impact we create together. Join us and help run what runs the world.

This position reports to:

Vedoucí zakázkové konstrukce

—

We are looking for a Contract Designer for the HV Switchgear unit in Brno at Vídeňská. In this position, you will be one of the members of the project team and will be responsible for the design side of the switchgear.

If your experience and knowledge in design extends beyond the electrical field, you are an ideal candidate.

Job description:

Preparation and design processing of HV switchgear order documents for the project according to the technical specifications and customer requirements

Assessment of design solutions for HV switchgear for the project with regard to production possibilities

Input and ordering of the correct technical and functional solution of the primary parts of HV switchgear and devices for the project in the SAP system

Creation of technical documentation for the customer in 2D

Responsibility for the completeness, correctness and up-to-dateness of the design documentation and its technical level and quality

Cooperation on the order with the project team

Processing of relevant administration

Who we are looking for:

Secondary/university education in the electrical field (we prefer the heavy current field) or mechanical education with experience and interest in the electrical field

User knowledge of working in 2D / 3D programs (Solidworks, DraftSight)

Knowledge of the Czech and English language for communication with a foreign customer (mainly by email), minimum level B2

Flexibility, attention to detail and detection of errors, proactive approach to work and communication, coordination skills

Active approach, good ideas, ability to work in a team and independently

Decree No. 50 and knowledge of HV switchboards are an advantage

ABB offers:

An expanding company with a strategy for further expansion of production capacities, with an innovative approach and focus on the customer

Wide opportunities for expanding professional and qualification education, growth in the field of professional practice

A perspective of stable and long-term employment

Possibility of further career, professional and personal development

Our benefits:

5 weeks of vacation

Shorter working hours - 7.5 hours a day

After training, the possibility of working from home 1 day a week

Cafeteria system (the possibility of using points collected in the field of education, sports or other leisure activities)

Contribution to supplementary pension insurance

Retirement bonus

Subsidized meals in the company cafeteria

Extra time off for special life situations

Loyalty bonuses for years of service

Benefit SIM cards are with a preferential flat rate

Wide possibilities for expanding professional and language training and others according to the rules of ABB s.r.o.

We look forward to your application. If you want to find out more about ABB, visit our website www.abb.com. We also invite you to a virtual tour of our largest Czech electrical engineering division in Brno at the link https://prohlidky.virtualvisit.cz/ABB/.
