Job Title: Bengali Language Specialist (SME)
Experience: Not specified
Employment Type: Hourly, Remote Contractor
Industry: AI Data Services / Artificial Intelligence / Language Services

Job Summary:
Work as a Bengali Language Specialist (SME) to evaluate and improve AI-generated Bengali content by reviewing language quality, accuracy, fluency, grammar, tone, and cultural appropriateness. The role involves creating high-quality reference content, providing detailed feedback, comparing AI responses, and helping train advanced AI language models.

Responsibilities:
- Review and evaluate AI-generated Bengali content for accuracy, fluency, grammar, spelling, tone, and cultural appropriateness.
- Create high-quality Bengali prompts, reference answers, and model responses across various domains.
- Compare and rank multiple AI-generated responses based on correctness and overall quality.
- Identify and correct translation errors, ambiguity, inconsistencies, and logical issues.
- Fact-check AI-generated content when necessary.
- Provide detailed written feedback and high-quality rewrites.
- Detects unsafe, misleading, biased, or policy-violating content.
- Contribute to improving the performance and reliability of AI language models.

Requirements:
- Strong proficiency in the Bengali language.
- Excellent writing, editing, and proofreading skills.
- Ability to assess language quality, reasoning, and factual accuracy.
- Strong attention to detail and analytical skills.
- Ability to provide clear, constructive written feedback.

Preferred:
- Experience in AI data annotation, language evaluation, or content review.
- Background in linguistics, translation, localization, or language-related fields.
- Familiarity with AI language models and prompt evaluation.
- Experience with fact-checking and quality assurance processes.
