For College Students Only!

Performance based stipend up-to 7500.00/-

About the Company

UM IT Solutions is a technology and consulting organization focused on helping businesses grow through data-driven insights and digital solutions. The company provides practical exposure and industry-relevant training, enabling students and graduates to gain real-world experience in business analysis, data interpretation, and strategic decision-making.

About the Role

As a Business Analyst Intern, you will work on analyzing business processes, preparing reports and dashboards, gathering requirements, and supporting data-driven decision-making. This role provides hands-on experience in understanding business operations and converting data into actionable insights.

Responsibilities

- Analyze business processes and identify improvement opportunities
- Prepare reports and dashboards to present business insights
- Gather and document business requirements
- Support data-driven decision-making within projects
- Assist teams in interpreting business and operational data

Qualifications

- Students or recent graduates in Business, Business Analytics, Data Analytics, or related fields
- Strong analytical thinking and problem-solving skills
- Interest in business strategy and data interpretation

Required Skills

- Knowledge of Microsoft Excel
- Knowledge of Microsoft PowerPoint

Preferred Skills

- Familiarity with Power BI
- Familiarity with Tableau

Perks and benefits:

- Certificate of Internship
- Letter of Recommendation

- Opportunity to work on live business analysis projects
- Potential full-time opportunity based on performance
- Performance based stipend up-to 7500.00/-

Equal Opportunity Statement

UM IT Solutions is committed to creating a diverse and inclusive workplace. We encourage applicants from all backgrounds to apply.
