About the job

Job Description

At our company, we hold an uncompromising stance against mediocrity, committing ourselves to work that delivers audacious impact and is fueled by a pioneering spirit of continuous progress and innovation. This ambition is supported by leadership grounded in courage and clarity—ensuring alignment, accountability, and purpose in everything we do. Integrity shapes how we hire, recognize, and develop talent, with a focus on potential, ambition, and long term growth. Together, we operate with collective strength, prioritizing meaningful results over unnecessary rituals and navigating challenges with unity and resolve. Above all, we remain steadfast and resilient, never losing sight of our commitments and continuously pushing forward through complexity with determination and purpose to create a better life for all.

- Devise business Plan based on consumer behavior (product analysis based on pay-type, user & usage planning, revenue planning based on device, location, etc.)
- Identify new customer engagement and revenue opportunities and coordinate with relevant stakeholders to meet customer's perceived and existing needs in line with overall customer value management strategy
- Plan, Strategize and implement the corrective measures based on collecting feedback through Voice of the customer, market research and customer Care
- Drive adoptions of internal Digital assets and external digital services (Streaming, Gaming etc.) to build a more loyal customer base in the long run.
- Gamify customer experience in the app utilizing different tools, to ensure better customer stickiness and more value extraction in the long term.
- Identify development needs in app and in channels to deliver innovative campaigns and features, ensure execution collaborating with relevant Technical and cross functional teams and vendors.
- Design AI/ML models collaborating with cross functional teams to predict churn, retention, value upgrade or downgrade and other parameters and design effective plans to drive positive business impact
- Effectively capitalize different channels and touchpoints in and outside app
- Monitor overall GTM execution of the campaigns launched and measure, track and report on all campaign results and financial impacts of key initiatives
- Study and analyze different innovative customer value management global practices, different charging campaign management platforms and come up with innovative contextual campaigns utilizing different available features and attributes within the capability.

- Work with Business Analytics teams to gather analytics on customer segments and behaviors and turn the analytics into actions to ensure relevant customer engagement programs with sensible pricing and campaigns strategies.
