Data Entry Clerk

United States

This role is part of the Jobright Direct Hiring Network, where top companies like Cresta AI, Plaud, Mercor, OpenArt, and 1,500+ others hire top talent directly through our platform.
This is not a mass job posting. Only select, high-signal candidates are invited and recommended directly to hiring teams
Hiring Company: Chainlink Labs
One-liner: The market-leading oracle platform bringing the global financial system onchain. Chainlink Labs is looking for a detail-oriented Data Entry Clerk to accurately input, update, and maintain data records in their systems, supporting various departments and ensuring reliable information for project initiatives.
Salary: $20/hr - $40/hr
Why Join Us:
• Chainlink Labs provides the foundational infrastructure connecting blockchains to real-world data, offering critical security, interoperability, and integration for both Decentralized Finance (DeFi) and Traditional Finance (TradFi)
Role Responsibilities
• Input and update data in various systems accurately and efficiently
• Review and verify data for accuracy before entry
• Maintain organized and up-to-date records of all data entries
• Assist with data management and retrieval requests from team members
• Collaborate with cross-functional teams to ensure data consistency
• Identify and rectify discrepancies in data records
• Support the development and maintenance of data entry processes
• Participate in training related to data management tools and systems
Qualifications
Required
• High school diploma or equivalent
• Strong attention to detail and accuracy in data entry
• Basic understanding of spreadsheet and database software
• Excellent organizational and time management skills
• Ability to work independently and in a team environment
• Strong communication skills, both written and verbal
• Proficient in handling confidential information with integrity

Preferred

• Familiarity with data entry software is a plus
