Digital Marketing Manager
India

About the job
About The Company

Lonza Bioscience is a leading provider of innovative solutions and tools for life science researchers worldwide. Our mission is to empower scientists and organizations to develop and test therapeutics efficiently and effectively, spanning the entire spectrum from basic research to product release. With a comprehensive portfolio that includes cell and gene therapies, recombinant proteins, vaccines, and injectable drugs, we are committed to advancing scientific discovery and healthcare innovation. Our expertise in primary human cell biology tools and bioprocessing technologies positions us as a trusted partner in the biotech and pharmaceutical industries. At Lonza, we foster a culture of collaboration, integrity, and excellence, dedicated to powering the performance of our clients and partners across the globe.

About The Role

The Manager of Digital Marketing at Lonza is a pivotal role responsible for overseeing the governance and management of product content, taxonomy, digital assets, and content quality standards within our bioscience division. This position is primarily focused on ensuring that our ecommerce platforms deliver accurate, consistent, and scalable product information tailored to various markets. The role involves managing Product Information Management (PIM) and Product Content Management (PCM) within SAP Commerce Cloud, including defining product attributes, enrichment rules, taxonomy alignment, localization readiness, and integrating digital assets through Digital Asset Management (DAM) platforms. The Manager operates at a hands-on specialist level, combining detailed execution with governance responsibilities, process ownership, and cross-functional collaboration with teams across Technology, Marketing, and Regional divisions. The goal is to maintain content integrity, platform performance, and operational continuity to support business growth and customer satisfaction.

Qualifications

To excel in this role, candidates should possess a strong background in ecommerce content management, particularly within enterprise platforms like SAP Commerce Cloud. Hands-on experience with PIM/PCM systems, managing product taxonomy, attributes, and enrichment rules is essential. Familiarity with DAM platforms such as Picturepark or Fotoware, along with metadata standards and asset readiness, is highly desirable. Candidates should demonstrate a solid understanding of product data quality standards, validation processes, and content QA methodologies, including pre-publish checks and minor HTML or markup adjustments. Effective cross-functional collaboration skills are crucial, especially with Technology, Marketing, and Business teams. A background supporting localization and multi-market ecommerce operations, as well as knowledge of SEO principles related to taxonomy and structured product data, will be

advantageous. Experience in regulated industries such as life sciences, biotech, or pharmaceuticals, along with SAP ERP familiarity, will further strengthen a candidate's profile.

Responsibilities

Own and govern PIM/PCM processes within SAP Commerce Cloud, ensuring product data standards, enrichment rules, attribute completeness, and lifecycle management are maintained for accuracy and consistency across the catalog.
Maintain and update business rules for product attributes, filters, facets, and catalog structures to support both customer experience and commercial objectives.
Define and enforce standards for product titles, descriptions, imagery, naming conventions, and controlled vocabularies to ensure high-quality, consistent content.
Collaborate with product managers, campaign teams, creative, and ecommerce teams to resolve content gaps, imagery issues, taxonomy discrepancies, and SKU readiness requirements.
Conduct regular audits to monitor product content completeness and asset coverage, identifying and addressing gaps in product copy, classification, and metadata.
Manage product taxonomy, category structures, and classification standards to optimize findability, navigation, SEO, and scalable growth.
Lead digital asset governance within DAM platforms, including metadata standards, asset approval, and compliance with ecommerce usage policies.
Define and implement product data quality standards, performing audits and validation checks to ensure content is complete, accurate, and ready for publication.
Coordinate localization efforts to ensure product content, attributes, and digital assets meet regional standards while supporting local market needs.
Validate content prior to publication, including taxonomy alignment, asset readiness, and adherence to content standards, performing minor HTML or markup edits as needed.
Collaborate with Technology and Marketing teams to support platform enhancements, data model changes, DAM integrations, and workflow improvements.
Ensure content quality assurance by verifying product, category, and CMS content prior to publishing, ensuring accuracy, completeness, and compliance.
Evaluate the impact of product content and taxonomy changes on platform performance, working with technical teams to implement scalable solutions.
Utilize tools like Google Analytics and GTM to identify opportunities for content and platform improvements.
Perform additional duties as assigned, contributing to continuous process improvements and team success.

Benefits

At Lonza, we offer a dynamic and inclusive working environment that fosters professional growth and innovation. Our employees benefit from an agile career path, competitive compensation packages that recognize high performance, and a comprehensive range of benefits tailored to role and location. We promote a healthy work-life balance and provide

opportunities for continuous learning and development. Our workplace culture emphasizes collaboration, integrity, and diversity, ensuring that every team member feels valued and empowered to contribute to our shared mission of advancing life sciences. Additionally, employees gain access to various health and wellness programs, flexible working arrangements, and global networking opportunities that support both personal and professional development.

Equal Opportunity

Lonza is committed to creating an inclusive environment where all employees are valued and treated with respect. We are an equal opportunity employer and do not discriminate based on race, gender, age, religion, disability, sexual orientation, or any other protected characteristic. We believe diversity drives innovation and excellence, and we actively
