Enterprise Technology Governance Advisory Board Member
Winterthur, Zurich, Switzerland

About the job

Location: Remote

Compensation: Advisory Position (Unpaid role offering strategic influence, early-stage growth support, and the opportunity to help scale a technology business serving regulated and compliance-sensitive markets)

Are you an enterprise technology, compliance, or go-to-market leader ready to help scale a platform designed to support safer and more accountable use of emerging technologies? We're seeking a seasoned advisor to join a Switzerland-based technology company's advisory board, providing expertise in commercial growth, strategic positioning, enterprise trust-building, and market access across regulated industries.

What You'll Do:

- Advise on growth strategy and market positioning for a platform serving organisations with governance, oversight, and compliance needs
- Support enterprise relationship development with decision-makers across legal, financial, risk, and other regulated environments
- Guide commercial traction efforts, including customer conversion, partnership development, and sales cycle acceleration
- Help shape the long-term growth of a technology business operating at the intersection of enterprise software, governance, and responsible technology adoption

Who We're Looking For:

- Senior executive with experience in enterprise software, compliance, risk, governance, or regulated technology markets
- Strong network in legal, financial services, insurance, enterprise operations, or other credibility-sensitive sectors
- Background in AI, data protection, regulatory strategy, or enterprise transformation is valued
- Track record of supporting early-stage growth through enterprise sales, strategic partnerships, or go-to-market execution
- Experience with fundraising, investor introductions, or scaling trust-based B2B technology businesses is a strong advantage
