About the job

Job Description

Job Title: Excel Expert

Job Type: Contract

Location: Remote

Job Summary: In this role, you'll apply your expertise to help train next-generation AI systems. Your work will shape how models learn, reason, and perform through high-quality, real-world input. No prior experience in AI is required — your domain knowledge is what matters.

Key Responsibilities

- Review, analyze, and enhance complex Excel files relevant to business operations, strategy, and data analysis.
- Provide detailed feedback and examples of best practices in Excel for operational and consulting use cases (excluding finance).
- Design, document, and share templates or solutions that reflect expert knowledge for AI learning purposes.
- Collaborate with the customer’s team to identify key workflows and operational challenges represented in Excel documents.
- Evaluate and simulate real-world business problems using advanced Excel features and formulas.
- Communicate clearly and effectively in written and verbal formats, ensuring precise and comprehensive documentation.
- Contribute to the creation of data analysis case studies and operational scenarios leveraging Excel expertise.

Required Skills And Qualifications

- Expert-level proficiency in Microsoft Excel, including advanced functions, pivot tables, data validation, and automation tools.

- Proven experience developing Excel solutions for business operations, strategy, or consulting environments.
- Strong analytical skills and the ability to solve complex, non-financial business problems using Excel.
- Excellent written and verbal communication skills, with a keen eye for detail.
- Ability to document processes, create instructional materials, and provide clear, actionable feedback.
- Experience with data analysis, scenario modeling, and workflow optimization in Excel.
- Self-motivated, proactive, and comfortable working independently in a remote setting.

Preferred Qualifications

- Background in business operations, strategy, or management consulting.
- Familiarity with AI training or contributing to machine learning datasets in a domain capacity.
- Experience developing Excel-based tools or dashboards for operational excellence initiatives.
