IT Director

Dubai, Dubai, United Arab Emirates

Role Description The IT Director role is a part-time, hybrid position based in Dubai, with flexibility for some work from home. The IT Director will oversee day-to-day IT operations, ensuring reliable system performance and timely support for internal stakeholders. Responsibilities include developing and implementing IT strategies aligned with business goals, managing IT infrastructure and applications, and maintaining robust network security and data protection measures. The role involves coordinating with vendors and service providers, managing IT budgets and resources, and establishing policies and procedures for technology usage and compliance. The IT Director will also lead periodic technology reviews, identify improvement opportunities, and guide a small IT team or external partners to deliver effective, secure, and scalable solutions.

Qualifications

- Proficiency in IT Management and IT Operations, with experience overseeing daily technology activities and support.
- Strong foundation in Information Technology, including systems, infrastructure, and enterprise applications.
- Demonstrated expertise in Network Security and data protection, including security policies and risk mitigation.
- Ability to define and execute IT Strategy aligned with organizational objectives and future growth.
- Several years of leadership experience in IT or technology management, preferably in a director or similar role.
- Bachelor's degree in Information Technology, Computer Science, Engineering, or a related field; advanced certifications (e.g., ITIL, CISSP, PMP) are an advantage.
- Strong analytical, problem-solving, and decision-making skills, with the ability to prioritize multiple initiatives.
- Effective communication and stakeholder management skills, with the ability to collaborate across departments.
- Experience working in hybrid work environments and managing distributed teams or external IT partners.
