🌟 We're Hiring: **Information Security Manager**

📍 Location: United Arab Emirates (Remote)

🕒 Employment Type: Full-Time

💼 Level: Mid-Level – Senior Level

📊 About Us

We are a technology-driven organization committed to safeguarding information assets, protecting customer data, and enabling secure digital innovation. Our teams collaborate across cybersecurity, IT infrastructure, software engineering, cloud operations, risk management, compliance, legal, privacy, and executive leadership to build resilient security capabilities that support business growth, regulatory compliance, and operational excellence.

🎯 The Role

We are seeking an experienced Information Security Manager to lead the organization's information security strategy, governance, and operational security programs. The ideal candidate will oversee security policies, risk management, incident preparedness, security operations, and compliance initiatives while ensuring the confidentiality, integrity, and availability of enterprise information systems and data.

🚀 Key Responsibilities

• Develop and implement information security strategies, policies, standards, and governance frameworks aligned with organizational objectives, cybersecurity best practices, and regulatory requirements

• Lead enterprise information security programs covering governance, risk management, security operations, vulnerability management, identity and access management, data protection, cloud security, endpoint security, network security, and application security

• Collaborate with IT, cloud engineering, software development, infrastructure, compliance, legal, privacy, risk management, internal audit, and executive leadership to integrate security controls across business operations and technology environments

• Conduct enterprise risk assessments, security architecture reviews, threat modeling, vulnerability assessments, penetration testing coordination, and security audits to identify and mitigate cyber risks

• Monitor key performance indicators (KPIs) including security incident trends, vulnerability remediation timelines, security compliance rates, audit findings, security awareness completion, system hardening status, and risk reduction metrics

• Oversee security monitoring, incident response preparedness, threat intelligence, security investigations, and remediation efforts in partnership with Security Operations Center (SOC) teams and technology stakeholders

• Ensure compliance with industry frameworks and regulatory requirements including ISO 27001, NIST Cybersecurity Framework, CIS Controls, SOC 2, PCI DSS, GDPR, applicable privacy regulations, and internal security standards
• Develop and deliver enterprise security awareness, phishing simulation, cybersecurity education, and policy compliance programs that strengthen organizational security culture
• Evaluate emerging cybersecurity technologies, Zero Trust architectures, artificial intelligence (AI)-powered security solutions, cloud-native security platforms, and automation opportunities to continuously improve the organization's security posture
• Utilize Security Information and Event Management (SIEM) platforms, Security Orchestration, Automation and Response (SOAR) tools, endpoint detection and response (EDR) solutions, vulnerability management platforms, Microsoft Office Suite, Power BI, and security analytics tools to monitor security operations and generate actionable insights
• Prepare security dashboards, risk assessments, audit reports, executive briefings, compliance documentation, and strategic recommendations for senior leadership and governance committees
• Lead, mentor, and develop information security analysts, security engineers, governance specialists, and cross-functional teams while fostering a culture of security, accountability, innovation, resilience, and continuous improvement

✅ Requirements

• Bachelor's degree in Cybersecurity, Computer Science, Information Technology, Information Systems, Software Engineering, or a related field preferred
• Master's degree or professional certifications such as Certified Information Systems Security Professional (CISSP), Certified Information Security Manager (CISM), Certified in Risk and Information Systems Control (CRISC), CompTIA Security+, ISO 27001 Lead Implementer, or equivalent are highly advantageous
• 5+ years of experience in information security, cybersecurity, IT risk management, security operations, or related information security leadership roles
• 2+ years of experience managing information security programs, cybersecurity teams, or enterprise security initiatives preferred
• Strong understanding of information security governance, risk management, cloud security, identity and access management (IAM), network security, endpoint protection, application security, data protection, vulnerability management, and incident response principles
• Experience with SIEM platforms, SOAR solutions, EDR tools, cloud security platforms (AWS, Microsoft Azure, or Google Cloud Platform), Microsoft Office Suite, Power BI, vulnerability management platforms, and security monitoring technologies

• Familiarity with DevSecOps, Zero Trust architecture, AI-powered cybersecurity, threat intelligence, digital forensics, compliance automation, and secure software development lifecycle (SSDLC) practices is advantageous
• Strong leadership, strategic thinking, analytical, technical, organizational, and problem-solving skills
• Excellent communication, stakeholder management, technical documentation, presentation, and cross-functional collaboration abilities
• Ability to balance cybersecurity risk, regulatory compliance, operational efficiency, and business enablement while protecting enterprise information assets
• Ability to work independently in remote and hybrid environments

🌟 What We Offer

• Flexible remote / hybrid work opportunity within the United Arab Emirates
• Competitive compensation package
• Professional development and cybersecurity leadership growth opportunities
• Exposure to enterprise security transformation, cloud security, AI-powered cybersecurity technologies, and digital resilience initiatives
• Collaborative and technology-driven work environment
• Supportive culture focused on innovation, security, operational excellence, and continuous improvement
• Opportunity to lead enterprise information security initiatives that protect critical assets, support business growth, and strengthen organizational resilience
• Clear career progression within information security, cybersecurity leadership, enterprise risk management, technology governance, and executive technology management functions
