## Junior Architect

Lahore, Punjab, Pakistan

**Company Description:** LineWorks is a boutique architecture firm specializing in modern, functional, and visually compelling spaces. The team focuses on designs that balance simplicity, precision, and lasting appeal across both residential and commercial projects. Services include architectural and interior design, construction project management, and consultation on planning, materials, and sustainable solutions. LineWorks emphasizes collaboration with clients, using creative problem-solving and meticulous attention to detail to bring each vision to life. The firm is dedicated to enhancing how people live, work, and interact through thoughtful, innovative design.

**Role Description:** The Junior Architect role at LineWorks is a full-time, on-site position based in Lahore. This role involves supporting architectural design projects from concept through detailed documentation, including preparing drawings, models, and presentations under the guidance of senior architects. The Junior Architect collaborates with the design and project management teams to coordinate plans, review materials, and assist with site visits and inspections. Responsibilities also include ensuring design accuracy, incorporating sustainable and functional solutions, and maintaining organized project files and documentation. The role requires active participation in client meetings, internal reviews, and cross-disciplinary coordination to deliver high-quality architectural outcomes.

**Qualifications**

- Strong foundation in Architecture and Architectural Design, with the ability to support concept development and detailed design work.
- Familiarity with Software Development and Integration concepts as they relate to design tools, BIM platforms, or digital workflows.
- Basic understanding of Project Management principles, including planning, coordination, and documentation of architectural projects.
- Proficiency in industry-standard design software (e.g., AutoCAD, Revit, SketchUp, Adobe Creative Suite) and 3D visualization tools.
- Bachelor’s degree in Architecture or a closely related field; eligibility or progress toward professional licensure is an advantage.
- Strong analytical, problem-solving, and technical drafting skills, with attention to detail and accuracy.
- Effective communication and collaboration skills, with the ability to work in a multidisciplinary, on-site team environment.
- Interest in modern, sustainable design practices and willingness to learn and adapt to evolving project requirements and technologies.
