Product Manager
India

About the job

About The Company

GE Vernova is a global leader in energy technology, dedicated to transforming the energy landscape through innovative solutions and sustainable practices. As part of the General Electric family, GE Vernova focuses on advancing power generation, renewable energy, and energy infrastructure to support a cleaner, more reliable, and affordable energy future. The company prides itself on a rich history of engineering excellence, technological innovation, and commitment to environmental stewardship. With a diverse portfolio spanning traditional and renewable energy sources, GE Vernova aims to accelerate the global transition to a low-carbon economy by developing cutting-edge technologies and fostering strategic collaborations across industries and governments.

About The Role

The Product Manager for AI at GE Vernova plays a pivotal role in driving the development and deployment of artificial intelligence-powered products that revolutionize business processes and operational efficiencies. This role is integral to our mission of pioneering AI-driven innovations that enhance user experiences and deliver measurable value across the enterprise. The Product Manager will collaborate closely with cross-functional teams, including engineering, research, and business units, to identify opportunities, define product roadmaps, and oversee the lifecycle of AI solutions. A key aspect of this role involves working with both internal teams and external suppliers to ensure the successful integration and performance of AI applications, with a focus on safety, quality, delivery, and cost metrics. The role also involves facilitating cross-business coordination to leverage AI applications for operational improvements and strategic growth initiatives.

Qualifications

The ideal candidate will possess a Bachelor's Degree in Mathematics, Computer Science, Engineering, or a related field, with 10-15 years of relevant experience in product management, AI, or related domains. Experience working within GE or GE Vernova is highly preferred, providing familiarity with the company's operational context and strategic priorities. Strong business acumen,

technical expertise in AI development, and proven leadership skills are essential. The candidate should demonstrate excellent communication and presentation abilities, capable of engaging diverse stakeholders, including C-suite executives. Experience in building, deploying, and managing AI applications, along with analytical and problem-solving skills, is required. The candidate must also have proficiency in data-driven decision-making and a willingness to work out of the office located in Bangalore, India.

Responsibilities

- Product Ownership and Development: Collaborate with cross-functional teams, including business, engineering, and research, to develop and execute product roadmaps that align with strategic objectives.
- Roadmap Input: Provide input, alongside the Portfolio Manager, to build comprehensive product roadmaps that prioritize initiatives based on business impact and technical feasibility.
- Technical Collaboration: Work closely with data scientists, IT, and design teams to ensure the development of robust AI solutions, maintaining technical rigor and implementing verification methods to assess success and mitigate risks.
- User Experience: Focus on delivering exceptional user experiences by understanding user needs and incorporating feedback into product enhancements.
- Cross-Business Coordination: Support the integration and coordination of AI applications across various business units to drive operational efficiencies and foster innovation.
- Data-Driven Decision Making: Utilize analytics to monitor product performance, define success metrics, and make informed decisions to optimize AI initiatives.
- Post-Launch Support: Continuously monitor product performance after deployment, gather user feedback, and iterate on features to maximize value and impact.
- Third-Party Solutions: Oversee the integration of AI solutions from external suppliers, assessing technology fit and ensuring alignment with organizational standards and goals.

Benefits

GE Vernova offers a competitive benefits package designed to support the well-being and professional growth of its employees. This includes comprehensive health insurance, retirement plans, and wellness programs. Employees have access to continuous learning opportunities, professional development resources, and a collaborative work environment that fosters innovation. The company also provides relocation assistance for eligible candidates, supporting a smooth transition to the Bangalore office. Additionally, employees benefit from a culture that values diversity, inclusion, and sustainability, empowering individuals to contribute meaningfully to the company's mission and growth objectives.
