Project Manager - Web Development

SF Group · Dhaka, Dhaka, Bangladesh (On-site)

Company Description

SF Group of companies operates across multiple industries, including apparel sourcing, technology distribution, healthcare, construction, fashion, trading, and food products. Its buying house, Mega Sourcing and Merchandising, connects global buyers with apparel manufacturers in Bangladesh, focusing on quality and competitive pricing. Megastar Technology serves as the national distributor of Riversong and Megastar, delivering affordable, modern gadgets and accessories to customers nationwide. The group also includes Dhanmondi General Hospital, which provides personalized medical care, and Yellow Food, a leading biscuit brand known for high-quality ingredients. Other entities such as Mega Builders, Sajeda Fashion, Mega Fashion LLC, EMS, and Absolute Export and Import reflect the group's commitment to excellence and continued growth.

Role Description

This full-time, on-site Project Manager - Web Development role is based in Dhaka and focuses on overseeing web projects across SF Group's diverse business units. The Project Manager will coordinate requirements with internal stakeholders, define project scopes and timelines, and manage resources to deliver responsive, user-friendly websites and web applications. Daily responsibilities include tracking project progress, resolving issues and bottlenecks, aligning development work with branding and business goals, and ensuring quality through testing and reviews. The role involves collaborating closely with designers, developers, marketing teams, and external vendors, as well as preparing regular status reports and documentation for leadership. The Project Manager will also drive continuous improvement in web processes, standards, and performance metrics.

Qualifications

- Candidates should possess strong Project Management skills, including planning, scheduling, risk management, and stakeholder coordination.
- Candidates should possess Expeditor and Expediting skills to ensure timely completion of tasks, deliverables, and approvals throughout the project lifecycle.
- Candidates should possess Logistics Management skills to oversee resource allocation, vendor coordination, and smooth execution of web development activities.
- Candidates should possess Inspection skills to review web deliverables, conduct quality assurance checks, and verify compliance with functional and design requirements.
- Relevant experience managing web development projects (e.g., corporate websites, e-commerce platforms, or web applications) is highly beneficial.
- Working knowledge of web technologies, UX principles, and content management systems is preferred.

- Strong analytical, communication, and documentation skills, with the ability to collaborate effectively in cross-functional teams.
- Bachelor’s degree in Computer Science, Information Technology, Business, or a related field, or equivalent practical experience.
- Experience in multi-industry or group company environments and familiarity with agile or hybrid project management methodologies is an advantage.
