Senior Consultant

Kolkata, West Bengal, India

Company Description: Write4U® is a trusted provider of AI Data Services, Customer Experience (CX), and Business Process Outsourcing (BPO) solutions that help organizations optimize operations and accelerate digital transformation. With over 7 years of experience, Write4U® supports startups, enterprises, and global organizations with scalable, cost-effective, and quality-driven services tailored to evolving business needs. The ITES and BPO division delivers end-to-end customer support, contact center operations, back-office processing, healthcare BPO, finance and accounting support, recruitment process outsourcing, verification services, e-commerce operations, and omnichannel customer engagement. The AI Data Services division focuses on high-quality data collection, annotation, model evaluation, RLHF, content moderation, synthetic data generation, and validation to power machine learning and generative AI solutions. Guided by a customer-first mindset, Write4U® serves diverse industries such as healthcare, e-commerce, banking, insurance, retail, logistics, telecom, and education, helping clients grow confidently through intelligent and scalable solutions.

Role Description: The Senior Consultant role at Write4U® is a consultancy based remote position responsible for advising clients on AI Data Services, CX, and BPO strategies and solutions. In this role, the Senior Consultant collaborates with client stakeholders to understand business objectives, designs tailored service models, and develops implementation roadmaps that improve efficiency and customer outcomes. Day-to-day responsibilities include leading discovery sessions, performing process assessments, preparing proposals and presentations, and overseeing pilot engagements or projects to ensure successful delivery. The Senior Consultant also analyzes performance metrics, identifies optimization opportunities, and translates insights into actionable recommendations. This role works closely with cross-functional teams, mentors junior consultants, and contributes to thought leadership, solution innovation, and best practices across the organization.

Qualification:

- Experience in consulting, client advisory, or solutions design for AI, CX, BPO, or ITES services, with the ability to translate complex business needs into clear, actionable strategies.
- Strong analytical and problem-solving skills, including experience with process mapping, performance metrics, and data-driven decision-making.
- Excellent communication, presentation, and stakeholder management skills, with the ability to work effectively with diverse, global teams in a remote environment.
- Proven track record in project leadership or program management, including planning, coordination, risk management, and successful delivery of client engagement.

- Familiarity with AI data workflows (e.g., data collection, annotation, model evaluation, RLHF) or CX/BPO operations (e.g., contact centers, back-office processing, omnichannel support) is highly beneficial.
- Comfort with technology-enabled processes and collaboration tools; experience in fast-paced, high-growth, or outsourcing.
