Job Title: Video Eval Annotator

Experience:

- Strong professional work experience
- Media/agency experience (mandatory)
- Hands-on experience working with designers, photographers, or videographers (mandatory)

Employment Type: Short-term Contractor (4 Weeks, Remote)

Industry: Artificial Intelligence / AI Data Services / Media & Content Evaluation

Job Summary:
Evaluate AI-generated and real-world video content using structured annotation guidelines to identify visual inconsistencies, hallucinations, and quality issues. The role involves assessing media realism, providing detailed evaluation feedback, and contributing to the development of high-quality AI training data and model evaluation benchmarks.

Responsibilities:

- Evaluate AI-generated and real-world visual media using predefined rating frameworks.
- Identify visual hallucinations and anomalies, including object morphing, disappearing objects, unrealistic movements, and inconsistencies.
- Provide clear, structured written justifications for evaluation decisions.
- Maintain consistency, accuracy, and attention to detail across high-volume annotation tasks.
- Assess video quality based on realism, motion, lighting, composition, camera movement, and production standards.
- Collaborate with teams to improve AI model evaluation quality and benchmark reliability.
- Incorporate feedback from LLM performance metrics into training data creation.
- Apply analytical reasoning and visual judgment to complex media evaluation tasks.

Requirements:

- Bachelor's degree or higher in Design, Visual Communication, Fine Arts, Film, Media, Animation, VFX, Photography, Cinematography, Architecture, Industrial Design, Creative Writing, or equivalent professional experience.
- Strong professional work experience.
- Mandatory media/agency experience.
- Mandatory hands-on experience working with designers, photographers, or videographers.
- Strong understanding of motion realism, lighting, composition, camera movement, and production quality.
- Strong analytical, logical reasoning, and research skills.
- Excellent communication, collaboration, and English proficiency.
- Ability to commit to full-time hours during the contract period.

Preferred:

- Experience with AI image or video generation tools.
- Immediate availability to join.
- Experience in AI data annotation, content evaluation, or media quality assessment.
