[HIRING] AI / ML Engineer & Software Developer (Remote | $15–$30/hr USD)

We are currently looking for developer talent and actively hiring developer candidates to join our team. We have a strong need ai engineer expertise, and are also looking for ml engineer professionals to help us build and scale modern AI systems. A freelance developer needed position is also open for contract-based work.

💼 Position

AI / ML Engineer / Software Developer (Freelance / Contract / Full-Time)

💰 Pay

$15–$30 USD per hour (based on experience and skill level)

🌍 Work Setup

Remote-friendly (international applicants welcome)

🔧 What You'll Do

- Build AI-driven features and backend services
- Design, train, and deploy ML / LLM-based models
- Work with APIs, cloud platforms, and scalable infrastructure
- Improve system performance, stability, and efficiency
- Collaborate on end-to-end product development

🧠 What We're Looking For

- Strong Python and backend engineering experience
- Hands-on ML or AI system development experience
- Familiarity with modern LLM tools, APIs, and cloud services
- Ability to ship clean, production-ready code
- Experience shipping real-world AI projects is a plus

🚫 Important Notes

- No bots, spam, or automated low-value work
- No "easy tasks" or sign-up schemes
- No commission-only arrangements
