[Hiring] Backend Developer Intern (3 Months) | Remote | Experience Certificate
We’re looking for a Backend Developer Intern to join our team for a 3-month internship.

This is an excellent opportunity for someone who wants to gain hands-on experience by working on live, industry-level projects rather than just practice assignments. You’ll collaborate with experienced developers, contribute to real products, and strengthen your backend development skills.

Requirements:

* Good knowledge of Node.js

* Experience with Express.js

* Understanding of REST APIs

* Basic knowledge of databases (MongoDB/MySQL is a plus)

* Familiarity with Git is preferred

* Eagerness to learn and write clean, maintainable code

What you’ll get:

* Opportunity to work on real client and production projects

* Practical industry exposure

* Mentorship and learning opportunities

* Experience Certificate upon successful completion of the internship

Duration: 3 Months

If you’re interested, send me a DM with:

* Your resume

* GitHub profile (if available)

* Portfolio or any projects you’ve built
