Hiring: Part-time Remote (WFH) / Hourly Business & Tech Associate

I’m looking for a person who enjoys solving random problems & tasks.

This isn’t a fixed role like graphic designer or developer. Every day is different.

Examples of tasks:
•Create multiple product color mockups using AI (30–40 variations from one design)
•improve and format long Word documents, reduce unnecessary pages, fix spacing and layout
•Organize Excel/Google Sheets
•Research products, suppliers, software, or competitors
•Use ChatGPT, Claude, Gemini and other AI tools to speed up work
•Simple image editing and presentations
•Help automate repetitive business tasks
•Other miscellaneous business operations work.

You should:
•Be comfortable learning new tools quickly
•Have good business sense, with technical knowledge
•Must have access to Laptop or Desktop
•Be able to work independently with minimal supervision
•Have strong English communication skills
•Experience with AI tools.

Nice to have:
•Basic Photoshop/Canva/Figma
•Basic Coding Knowledge
•Website building
•Content Creation
•Basic automation (Apps Script, Zapier, Make, etc.)

This is a remote, part-time role with flexible hours. If you’re interested, DM me with:

Your location and time zone
Your experience
Tools you’re comfortable using
A few examples of similar work you’ve done
Your expected hourly or monthly rate
I’m looking for someone who enjoys figuring things out and can become a long-term part of the business.
Thanks
