Document Review Expert

Overview

In this role, you will evaluate AI-generated responses and provide detail-oriented corrections and improvements. This is a great opportunity for methodical experts with an eye for detail to contribute to high-impact AI research projects.

Basic Qualifications

- Bachelor's degree from a top-500 globally ranked university preferred
- Strong reading and written communication skills
- Ability to work independently and follow detailed task guidelines

Required Skills

- Strong critical reading skills with the ability to identify nuance, implicit meaning, and changes in detail
- Consistent and honest judgment, including the ability to give critical assessments when warranted
- Strict attention to detail and accurate application of structured evaluation guidelines
- Ability to work entirely without AI assistance

Preferred Experience

- Document-heavy professional experience (paralegals, executive assistants, etc.)
- Detail-oriented professional experience (client-facing industries such as consulting, banking, law)

Eligibility

- Native English fluency required

Role Highlights

- Minimum 30 hours per week (ideally 40+)
- Fully remote — must be based in the United States.
- Role starts immediately, applications reviewed on a rolling basis

We consider all qualified applicants without regard to legally protected characteristics and provide reasonable accommodations upon request.
