Full Stack Engineer - Early Career

at Glide • Full-time

Why You'll Love This Role (Especially if you're a new grad):

- A unique opportunity to work side-by-side with Glide's founders and senior engineers, learning directly from industry veterans.
- Gain hands-on, end-to-end experience across the full stack: from architecture design to deployment.
- Be part of a small, fast-moving startup, where your code has immediate impact.
- Get mentorship and exposure to real-world engineering best practices, product development, and startup culture.

Your Responsibilities:

- Move seamlessly between frontend and backend to build a well-tested, secure frontend for our core web product.
- Create trustworthy, safe user experiences by building interfaces that are simple, reliable, and performant using tools like Typescript, React, Node.js and NextJS.
- Design a scalable architecture that can serve hundreds of thousands of end users.
- Bring designs to life through beautifully-crafted code.
- Articulate a long-term technical direction and vision for maintaining and scaling our web product suite.
- Lead frontend and backend infrastructure & tooling for an ambitious product roadmap.

Need-to-Haves:

- Experience with Javascript and tools like Typescript, React, Node.js and NextJS.
- Experience with modern, responsive HTML & CSS.
- Experience using data fetching libraries like React Query/Tanstack or tRPC to synchronize client and server data.
- Excellent understanding of software engineering best practices (architecture, test-driven development, component libraries).
- Excellent understanding of security in software engineering and of how to build secure, unassailable systems.
- Experience with automated testing frameworks.
- Experience with CI/CD, Version Control, and DevOps tools like Amazon Web Services, Git and Docker.
- Experience working in agile development teams.

Compensation

- $100K – $130K • Offers Equity

Nice-to-Haves:

- 0-3 years of full-time software engineering experience.

- Thrives in a fast-paced environment and seeks to learn from and collaborate with a team of all-star senior engineers.
- A desire to own a product end-to-end, from conception to design to technical specification to implementation to delivery.
- A collaborative, entrepreneurial spirit.

Perks and Benefits:

- Competitive Compensation:
  You'll receive a competitive salary and a generous equity package for joining us at Glide.
- Wellbeing Credits (for US employees)
  Besides stellar health, dental, and vision insurance, we offer a generous health and wellness stipend, so you can stay healthy and active.
- Lunch on us (for US employees)
  We love food. Every member of the Glide team gets free lunch, every day. No one goes hungry around here
- Best Tools
  We want you to be happy at work. You'll get a full equipment upgrade - from a top-of-the-line computer to your preference on keyboard, mouse, and accessories.
