Lawyers

1. Role Overview Mercor is partnering with a leading AI organization to engage practicing attorneys for a project focused on improving the legal reasoning of AI systems. This flexible, contract-based engagement involves evaluating and refining model-generated legal content to make it more accurate, clear, and useful.

2. Key Responsibilities

- Review and refine AI-generated legal outputs for accuracy and clarity
- Evaluate legal reasoning across a range of practice areas
- Verify claims against primary authority (statutes, regulations, cases, official guidance)
- Collaborate with researchers to assess and improve model performance

3. Ideal Qualifications

- JD from an ABA-accredited US law school
- Active US bar license, in good standing
- 3+ years in practice with client- or matter-facing advisory experience
- Demonstrated ability to locate and cite primary authority
- Generalist / multi-practice exposure a plus
- Clear, plain-language writer comfortable researching outside a primary specialty

4. More About the Opportunity

- Remote and asynchronous — flexible scheduling
- Project-based work at the intersection of law and AI

5. Compensation & Contract Terms

- $100–200/hour for U.S.-based professionals
- Paid weekly via Stripe Connect
- Independent contractor engagement
