[Hiring] Personalized Life Assistant Experts - Help Build Better Personal AI Assistants

A leading AI research organization is hiring **Personalized Life Assistant Experts** to evaluate how well AI systems handle real-world, high-context personal workflows.

Location: United States (Remote)
Type: Hourly Contract
Pay: $50-$200/hr
Commitment: 15-40 hrs/week

What you'll do:

• Evaluate AI responses for usefulness, personalization, realism, and practical value
• Create prompts, execute real-life tasks, and develop detailed evaluation rubrics
• Identify where AI succeeds, fails, overreaches, or misses important context

Ideal for heavy users of ChatGPT, Claude, Gemini, Perplexity, Cursor, Codex, and other AI tools who regularly use LLMs for planning, research, decision-making, and personal productivity.

Requirements:

• Extensive experience using AI for multi-step personal workflows and complex life tasks
• Strong written judgment, attention to detail, and rubric evaluation skills
• 100+ hours of prior rubric design, evaluation, or quality assessment experience

Bonus: Experience using AI for personalized health, food recommendations, career planning, learning, or productivity systems is highly valued.

Special Note: Includes a paid work trial ($30), expected commitment of 15–40 hours/week, and tasks typically require a 24-hour turnaround.
