# Roblox Production Team // Up to $250 Per Project // Or long term

Hello, my name is The Armored Boi- I am currently building a Roblox multiplayer exploration/survival game under the working title **Hyperoxia**, and I am looking to assemble a small production team for paid project-based work.

The game is an atmospheric scavenging and progression-based experience where players explore dangerous environments, recover valuable resources, upgrade their equipment, customize their personal space, and uncover a larger story over time. The full lore, major mechanics, and story details will only be shared with selected team members on a need-to-know basis.

This project is intended to have a darker, mysterious, corporate-controlled survival tone with strong environmental storytelling, immersive world design, and replayable multiplayer gameplay.

## Positions Needed

## World Builder / Environmental Designer

Looking for someone who can create atmospheric Roblox environments with strong mood, layout, and detail. Experience with abandoned, industrial, sci-fi, overgrown, corporate, or survival-style maps is a plus.

## Lua Scripter

Needed for core gameplay systems, including player progression, resource collection, inventory-style mechanics, upgrades, multiplayer functionality, interactable objects, UI systems, and general game polish.

## 3D Modeler / Asset Creator

Needed for props, tools, equipment, environmental assets, decorations, survival gear, corporate-style objects, and unique interactable items.

## UI / UX Designer

Needed for clean, immersive menus, player status displays, shop/upgrade interfaces, customization menus, and simple readable gameplay HUD elements.

## Voice Actors

Looking for voice talent for atmospheric announcements, character dialogue, corporate messaging, radio-style communication, and other in-game audio. Clear microphone quality required.

## Animator

Needed for tool animations, player interactions, creature/object movement, equipment usage, and cinematic-style moments.

## VFX / Lighting Artist

Needed for atmosphere, particles, warning effects, environmental hazards, lighting passes, and general visual polish.

## QA Testers / Playtesters

Needed later to help test gameplay balance, bugs, multiplayer issues, progression pacing, and general player experience.

## Payment

Payment is **project-based**, with compensation of **up to $2**50 **per assigned project**, depending on the size, complexity, and quality of the work required. *Robux/ Your local currency.*

If you are looking to stick around long term, perhaps something for your resume- we can discuss compensation along milestones.

Smaller tasks may be paid below that amount, while larger scoped work may be split into multiple paid milestones. Payment terms will be discussed clearly before any work begins.

## What I’m Looking For

Applicants should be reliable, communicative, and able to work with references and direction. I am not looking for people who need every detail of the game upfront before applying. Selected team members will receive private role-specific briefs once accepted.

Please be prepared to show examples of previous work, such as Roblox games, builds, scripts, models, UI, voice samples, or portfolio images.

# Confidentiality

Because this project has story twists, unique gameplay ideas, and unrevealed mechanics, full game details will not be posted publicly. Accepted applicants will only receive the information needed for their specific role.

Please do not apply if you are only looking to collect concept details or unused ideas.

# How to Apply

Please reply or message me with the following:

(Your Choice) Gamertag / Name / Roblox Username:
Position Applying For:
Portfolio or Examples:
Experience Level:
Availability:
Expected Rate or Project Pricing:
Discord Username:
Any Relevant Notes:

**Discord: @ armoredboi**

I am mainly looking for serious applicants who want to help build a polished, atmospheric Roblox experience with long-term potential.

Thank you!
