Senior Software Engineer Expert

we are hiring Senior Software Engineers for a high-urgency closed-source application development project. We're looking for experienced full-stack developers who can work independently, build scalable systems, and contribute across backend and frontend development.

Responsibilities

- Design, develop, and maintain full-stack applications
- Build and integrate APIs and MCP-based systems
- Collaborate closely with engineering and product teams
- Write clean, scalable, and production-ready code
- Troubleshoot, optimize, and improve application performance
- Participate in architecture and technical design discussions

Minimum Qualifications

- Multiple years of experience as a Full Stack Developer
- Strong proficiency in Python
- Experience with MCP and API development
- Ability to work at least 8 hours per day
- Experience building and maintaining production-grade applications
- Strong problem-solving and communication skills

We consider all qualified applicants without regard to legally protected characteristics and provide reasonable accommodations upon request.
