I'm hiring a Social Media VA for my agency Seraphim Management (AI-driven content marketing).

We create and sell AI-generated influencer-style content (photo + video) and manage social media content workflows across platforms like Instagram and TikTok. This role is focused on getting content live — pulling assets from Google Drive, loading them onto the right virtual device, posting on schedule across multiple creator accounts, and keeping each account warm and engaged.

Pay: $3–$4/hr (USD) dependent on experience + performance bonuses.

This is a long-term role with serious growth potential if you perform well.

What you'll be doing:

- Downloading scheduled content (photos + videos) from Google Drive and transferring it to the correct virtual device for each account
- Posting to multiple Instagram and TikTok accounts at exact scheduled times (timezone-precise)
- Adding the assigned captions, hashtags, music/audio, tags, and locations exactly as specified per post
- Running daily account warm-up routines on new and existing accounts (scrolling, watching, liking, following, varied session lengths) to build trust and avoid restrictions
- Daily engagement on each account — liking, commenting, interacting with target accounts and niche content to grow reach
- Following posting schedules and content calendars without deviation
- Managing multiple accounts across multiple virtual devices without crossing wires (right asset, right account, right device, right time)
- Final checks before posting (correct cover frame, caption formatting, audio synced, location pinned)
- Logging posts, warm-up activity, and engagement actions; flagging anything that failed, got delayed, or triggered a platform warning
- Basic database entry

What I'm looking for:

- Strong English (C1+) — needed for writing comments that sound natural
- Reliable internet + ability to post and engage on time, every time (including evenings/weekends when the schedule calls for it)
- Experience managing multiple social media accounts (Instagram and TikTok especially)
- Understanding of account warm-up best practices and what triggers shadowbans, action blocks, or bans
- Comfortable working with Google Drive, virtual devices/emulators, and juggling multiple account logins without mixing them up
- Familiarity with Instagram and TikTok posting flows — adding music, tagging accounts, setting locations
- Strong aesthetic sense / eye for content
- Tech-savvy and able to learn fast

- Extremely detail-oriented (wrong account, wrong caption, wrong audio, wrong time, or sloppy warm-up = the job)
- Hardworking + reliable (deadlines are daily, not weekly)

Interview process: If shortlisted, you'll complete a few quick tests to evaluate:

- English ability
- Reliability and timezone discipline (a short scheduled-posting test)
- Ability to follow a multi-step posting brief precisely (caption + audio + tags + location)
- Knowledge of account warm-up and engagement best practices
