[Hiring] **Software Developers — Remote**
Quick post — we're bringing on a couple of developers for remote work.

We're a small team in SF that raised 2M in funding.

Looking for people who can help build features, fix issues, improve existing code, and ship real updates.

Must have:
- At least 1 year of software development experience
- Comfortable using GitHub
- Able to ship working code
- 1 year of experience: JavaScript, TypeScript, React, Next.js, Node, supabase and Vercel serverless.
- English native
- Comfortable working independently
- Redence.ai verified profile
- High agency. You don't wait around to be told every small step.

Nice to have:
- Experience with APIs, backend systems, auth, payments, or AI tools.
- Experience with edge functions in supabase
- Railway deploying
- Public projects, GitHub repos, or shipped apps
- Startup or freelance experience

What you get:
- Remote/hybrid work
- Remote setup
- Flexible hours
- Practical product work
- $50-65/hour depending on experience
- O-1 visa support may be available for exceptional candidates.
