Video Game Annotator

Overview

We are looking for video game enthusiasts to annotate high-quality gameplay sessions. Your annotations will be used to help train next-generation AI models that learn from real player behavior.

This is a remote, flexible, hourly role ideal for individuals who enjoy gaming and have access to a reliable PC setup.

Responsibilities

- Annotate assigned games (e.g., Minecraft, open-world or exploration-based games) for structured sessions (typically 15–60 minutes)
- Follow simple annotations instructions (e.g., exploration, basic interactions, task-based play)
- Ensure recordings meet quality requirements (no lag, stable FPS, correct settings)

Basic Requirements

- Access to personal Windows computer
- Comfortable and able to install recording software for gameplay and input capture
- Reliable internet connection for uploading large video files
- Attention to detail and willingness to follow setup guidelines

We consider all qualified applicants without regard to legally protected characteristics and provide reasonable accommodations upon request.

Contract and Payment Terms

- You will be engaged as an independent contractor.
- This is a fully remote role that can be completed on your own schedule.
- Projects can be extended, shortened, or concluded early depending on needs and performance.

- Your work at Mercor will not involve access to confidential or proprietary information from any employer, client, or institution.
- Payments are weekly on Stripe or Wise based on services rendered.
- Please note: We are unable to support H1-B or STEM OPT candidates at this time.
