3D Designer
Location: Ras Al Khaimah
Salary: Up to AED 5,000 + Accommodation & Transportation

Industry: Service

Job Brief:

Our client, a company operating in the **stainless steel manufacturing industry**, is hiring for a 3D Designer job in Ras Al Khaimah.

The role involves creating **accurate 3D designs and models of stainless steel kitchen equipment** used in commercial and industrial kitchen environments. The designer will work closely with the production and engineering teams to ensure that designs are practical, precise, and aligned with manufacturing requirements.

The ideal candidate should have **at least 2 years of experience working in a manufacturing environment**, with hands-on experience in **designing stainless steel kitchen equipment or similar metal fabrication products**.

Job Responsibilities:

- Create **3D designs and models of stainless steel kitchen equipment** in accordance with project specifications and production requirements.

- Prepare **detailed design drawings and 3D visualizations** for manufacturing and fabrication processes.
- Work closely with the **production and engineering teams** to ensure designs are feasible and aligned with manufacturing capabilities.
- Modify and update designs based on **technical requirements, production feedback, and client specifications**.
- Ensure that all designs maintain **accuracy, quality standards, and functionality** required for stainless steel kitchen equipment manufacturing.
- Assist in translating **concepts and technical requirements into clear design outputs** that can be used by the production team.
- Maintain proper documentation of **design files, revisions, and project drawings**.

Job Requirements:

- **Minimum 2 years of experience** working as a 3D Designer in a **manufacturing company**.
- Experience in **designing stainless steel kitchen equipment** or similar metal fabrication products.
- Strong knowledge of **3D design and modelling tools** used in manufacturing environments.
- Ability to prepare **accurate technical drawings and 3D models** for production purposes.
- Good understanding of **manufacturing processes related to stainless steel fabrication**.
- Strong **attention to detail and problem-solving skills**.
- Ability to work collaboratively with **engineering, production, and technical teams**.
- Good **communication and coordination skills**.
