Hostinger

You have a mission. We have a rocket. Let’s launch your website online

Join Hostinger, and we’ll grow fast! 🚀

We’re shaping the future of online success - powered by AI and driven by people. With 900+ talented professionals and over 4 million clients in 150 countries, we help creators and entrepreneurs bring their ideas to life faster and easier than ever before.

Our mission: To provide tools that help individuals and small businesses succeed online faster and easier.
Our culture: Guided by 10 company principles.
Our formula for success: Customer obsession, innovative products, and talented teams.

Your day-to-day

- Turn data into game-changing insights - partner with teams across the business (revenue, product, finance, customer success and other) to solve real problems, uncover hidden opportunities and drive data-informed decisions.
- Build dashboards that make an impact - create powerful visualizations that give teams at Hostinger the visibility and confidence to take action, while ensuring data integrity and validity.
- Use SQL and Tableau to extract and analyze data.
- Challenge the status quo - improve our current analytical methods, speed up decision-making and support data-driven culture across Hostinger.
- Collaborate with our top-notch Data Platform team - work closely with data engineers and analytics engineers to ensure data availability, efficient processes and successful project execution.

Real projects you might work on

- AI Web App Builder Dashboard - we recently launched Hostinger Horizons, our advanced web app builder. You'll work on dashboards to track and analyse user growth, engagement and unit economics, helping us make informed decisions on improving and scaling the product.
- Analysing AI Website Builder Users - our AI-powered Website Builder Team needs to understand product usage, user segments and types of websites created. Your insights could help us refine our approach and shape the future of Hostinger's Website Builder. If you want to go the extra mile - some product-related user flow analysis and A/B testing would be welcome too!
- Measuring Marketing Impact - we want to understand what happens after users receive communication - do they open it, visit our self-service panel or even make a purchase? Maybe an A/B test would help? Your input will help us improve marketing strategies and drive revenue, retention and other important metrics.
- Churn & Retention Analysis - diving deep into why our users stay or leave. This project involves creating dashboards, testing hypotheses about user behavior, segmentation and pricing sensitivity, as well as running A/B tests - all with the goal to improve retention.

- Improving Customer Success (CS) - by analyzing customer behaviour and patterns, you'll help us identify common issues, improve onboarding, refine our AI-powered chatbot and define what makes a successful CS conversation, shaping (and hopefully improving!) our customer experience.
- And many more, depending on your skills, interests and business needs.

Your skills and experience

- 2+ years of experience in a data analyst, business analyst, finance analyst or similar role.
- Hands-on SQL expertise - you can write queries, create and optimize dashboard models. Basically, ChatGPT asks you to check queries.
- Proficiency in data visualization tools - we use Tableau, but experience with other tools works too.
- A results-driven mindset - you love turning raw data into clear, actionable insights that drive business impact.
- Strong communication & collaboration skills - you can explain complex data in a simple way and work well with cross-functional teams.
- Bonus: Experience with Amplitude or other product analytics tools.
- Extra points for: experience with Python or R for data analysis, A/B testing experience or knowledge of statistical concepts.

Benefits for you

- 🚀 360 Growth: We provide limitless learning opportunities: access to platforms like Reforge and Scribd, global conferences, physical and digital libraries, feedback culture, and mentoring through TesoXchange. Advance your career with internal mobility and grow with a team eager to share knowledge and support your success.
- 🎯 Freedom & responsibility: Work on your terms: from modern offices in Kaunas, Vilnius, or Indonesia, the comfort of home, or anywhere in the world. Enjoy flexibility in managing your schedule and bring your ideas to life in a fast-paced, dynamic environment.
- 💪Wellness simplified: Your health comes first with insurance from Day 1, gym memberships, recharge leave, and regular health checks. Join sports, arts, and hobby clubs or simply enjoy the balance of a lifestyle that prioritizes wellness.
- 🎉 Work hard - play hard: Celebrate your achievements with company events like Summerfest & Winterfest, Town Hall, Meet the Client initiatives, team-buildings, and workations. Enjoy access to the Žalgiris Arena VIP Lounge and celebrate life's big moments with milestone gifts for weddings, new parenthood, and graduations.

Compensation

- Gross salary from 3800 EUR/month, depending on your experience and skills.
