Electrical Automation & Instrumentation Engineer

Location: Abu Dhabi
Salary: Based on experience

Industry: Paper Manufacturing

Job Brief:

We are looking for an experienced Electrical Automation & Instrumentation - EAI Engineer job in Abu Dhabi with a strong background in paper manufacturing. The ideal candidate should be well-versed in handling automation systems, drives, instrumentation, and electrical maintenance to ensure smooth plant operations and machinery reliability.

Job Responsibilities:

- Execute and monitor preventive, corrective, and condition-based maintenance for all electrical and automation systems.
- Lead the maintenance of drive systems, PLCs, SCADA, and field instrumentation specific to paper machine operations.
- Troubleshoot and resolve issues with ABB AC/DC Drives, PLCs (especially AC800M), MCCs, and Smart MCCs.
- Analyze and interpret electrical and control schematics for system troubleshooting and enhancements.
- Integrate hardware and software for multi-sectional drive systems, ensuring seamless operation.
- Supervise and support electrical installation and commissioning activities for system upgrades or new equipment.
- Develop and implement application software using AC800M with AC/DC drives for process automation.

- Maintain detailed documentation of maintenance tasks, equipment history, and system upgrades using SAP PM or other CMMS platforms.
- Ensure adherence to safety protocols and operational standards.

Job Requirements:

- Bachelor’s degree in Electrical, Electronics, or Instrumentation Engineering.
- Minimum **6+ years** of relevant experience in the **paper industry,** with a strong focus on automation and drive systems.
- Hands-on expertise in **ABB drive systems (ACS800/880), Siemens, and Schneider platforms.**
- Strong knowledge of electrical switchgear, protection relays, and drive communication protocols (Profibus, Modbus, etc.).
- Experience in the SAP Plant Maintenance (PM) module is essential.
- Ability to lead a team of technicians and coordinate with cross-functional departments.
- Excellent troubleshooting, documentation, and analytical skills.
