Growth Marketing Manager – Lifecycle
Austin, TX; New York, NY; Palo Alto, CA

ABOUT THE ROLE:
We're looking for a strategic, hands-on Growth Marketing Manager – Lifecycle to own and optimize the full post-acquisition customer journey for xAI's subscription products. You'll design, build, and iterate personalized, automated programs across email, SMS, push, in-app messaging, and other channels to turn curious users into loyal, high-value Grok subscribers — driving engagement, adoption, retention, expansion, and reduced churn.

This role sits at the intersection of growth marketing, product, data, and customer success. You'll combine behavioral insights, segmentation, experimentation, and creative storytelling to measurably increase customer lifetime value, net revenue retention, and overall subscription growth.

RESPONSIBILITIES:
Own end-to-end lifecycle strategy and execution: map customer journeys, define key stages (onboarding, activation, habit formation, expansion, renewal, win-back), and build multi-channel automated flows
Develop and launch high-impact campaigns and nurtures (welcome series, product education, milestone triggers, re-engagement, upsell/cross-sell, churn prevention, and subscription reactivation)
Build and refine audience segments using behavioral, usage, and subscription data to deliver hyper-personalized experiences
Partner closely with product, data/analytics, customer success, and engineering teams to align on triggers, messaging, and technical implementation
Set up, monitor, and optimize experiments (A/B, multivariate) to continuously improve open rates, click-through, conversion, retention, expansion revenue, and churn metrics
Analyze performance using SQL, Amplitude/Mixpanel, and other tools to identify drop-offs, opportunities, and ROI; report on key KPIs (activation rate, D30/D90 retention, expansion revenue, churn rate, LTV uplift, NRR)
Collaborate on content creation (copy, creative assets) and ensure brand voice consistency across all lifecycle touchpoints
Maintain and evolve the lifecycle marketing roadmap in line with product launches, seasonal campaigns, and business priorities
Champion best practices in personalization, frequency management, deliverability, privacy/compliance (GDPR, CCPA), and inclusive messaging
BASIC QUALIFICATIONS:
4–7+ years of experience in lifecycle marketing, retention/growth marketing, CRM marketing, or customer marketing (B2C e-commerce, SaaS, fintech, or consumer tech strongly preferred)
Proven track record owning lifecycle programs that drove measurable improvements in retention, engagement, expansion, or revenue (please share case studies or results in your application)

Hands-on expertise with marketing automation & CRM platforms (Braze, Iterable, Customer.io, Klaviyo, or similar)
Strong analytical skills — comfortable writing SQL for cohort analysis, funnel deep-dives, and behavioral metrics
Experience building and testing multi-channel journeys (email + SMS + push + in-app)
Excellent copywriting and storytelling skills — you can craft compelling, customer-centric messaging that converts
Data-driven mindset with a bias for action and rapid iteration
Comfortable working in ambiguous, fast-paced environments with cross-functional stakeholders
PREFERRED SKILLS AND EXPERIENCE:
Experience with advanced segmentation and personalization using tools like Segment, mParticle, or Census
Background in product-led growth (PLG) environments or hybrid PLG/subscription models
Familiarity with loyalty/rewards programs, referral mechanics, or subscription optimization (pricing, billing, upgrades/downgrades)
Exposure to AI-driven personalization or predictive churn modeling
Knowledge of web/mobile analytics (Google Analytics 4, Amplitude, Mixpanel) and experimentation platforms (Optimizely, VWO, Eppo)
COMPENSATION AND BENEFITS:
$125,000 - $225,000 USD

Base salary is just one part of our total rewards package at xAI, which also includes equity, comprehensive medical, vision, and dental coverage, access to a 401(k) retirement plan, short & long-term disability insurance, life insurance, and various other discounts and perks.

ITAR REQUIREMENTS:
To conform to U.S. Government export regulations, applicant must be a (i) U.S. citizen or national, (ii) U.S. lawful, permanent resident (aka green card holder), (iii) Refugee under 8 U.S.C. § 1157, or (iv) Asylee under 8 U.S.C. § 1158, or be eligible to obtain the required authorizations from the U.S. Department of State. Learn more about the ITAR here.
