Maintenance Engineer
Location: Ras Al Khaimah
Salary: Up to AED 5,000

Industry: Manufacturing

Job Brief:

We are hiring for a Maintenance Engineer job in RAK to support our client's machinery maintenance and troubleshooting activities within a manufacturing environment.
The role involves diagnosing mechanical issues, performing routine maintenance, and supporting production teams by ensuring machines such as **Trumpf, Salvagnini, and CNC machines** operate efficiently. The ideal candidate should have hands-on experience in machinery maintenance, troubleshooting, and preventive maintenance practices within a manufacturing environment.

Job Responsibilities:

- Perform **maintenance and troubleshooting of production machinery**, including equipment such as **Trumpf, Salvagnini, and CNC machines**.
- Diagnose mechanical and operational issues in production machines and implement **effective corrective actions** to minimize downtime.
- Conduct **routine inspections, preventive maintenance, and repair work** on machinery to ensure optimal performance and operational reliability.

- Monitor machine performance and identify potential issues to **prevent breakdowns and production delays**.
- Support production teams by ensuring that machines are **operating safely and efficiently**.
- Maintain accurate records of **maintenance activities, repairs, and troubleshooting tasks** carried out on equipment.
- Follow **company safety procedures and maintenance standards** when working on machinery and production equipment.
- Coordinate with internal teams when required to ensure **timely resolution of equipment-related issues**.

Job Requirements:

- **Diploma in Mechanical Engineering**.
- Minimum **2 years of experience in maintenance and troubleshooting of production machinery**.
- Hands-on experience working with **Trumpf, Salvagnini, and CNC machines**.
- Strong understanding of **mechanical systems and industrial machinery maintenance**.
- Ability to diagnose faults and perform **effective troubleshooting of production equipment**.
- Basic understanding of **preventive maintenance practices within manufacturing environments**.
- Good problem-solving skills and the ability to work **independently as well as within a team**.
- Willingness to work in a **manufacturing/production environment**.
