Production Supervisor
Location: Ras Al Khaimah
Salary: Up to AED 5,000 + Accommodation & Transportation

Industry: Stainless Steel Manufacturing

Job Brief:

We are hiring for a Production Supervisor job in RAK to support our client's manufacturing operations within the refrigeration and stainless-steel production industry.

The ideal candidate should have **at least 2 years of experience working in a refrigeration manufacturing environment**, along with **good knowledge of cooling systems and refrigeration equipment.**

Job Responsibilities:

- Supervise and coordinate **daily production activities** within the refrigeration manufacturing facility.
- Ensure that **production schedules and targets** are achieved efficiently while maintaining quality standards.
- Monitor the **manufacturing process related to refrigeration systems and cooling equipment**.
- Provide guidance and support to the **production team to ensure smooth workflow and productivity**.
- Ensure proper **handling, assembly, and installation of refrigeration components and cooling systems** during the production process.
- Maintain adherence to **quality control procedures and manufacturing standards**.

- Identify and address **production issues, delays, or technical concerns** to ensure continuous operations.
- Ensure that all production activities follow **workplace safety procedures and company policies**.
- Coordinate with other departments such as **engineering, maintenance, and quality control** to resolve operational issues.
- Assist in improving **production efficiency, workflow organization, and operational performance**.

Job Requirements:

- **Minimum 2 years of experience** working in a **refrigeration manufacturing company**.
- Good knowledge and understanding of **cooling systems and refrigeration equipment**.
- Experience in **supervising or coordinating production teams** in a manufacturing environment.
- Strong understanding of **production processes, quality control standards, and operational procedures**.
- Ability to **manage team performance and maintain production schedules**.
- Good **problem-solving and decision-making skills**.
- Strong **communication and coordination skills**.
- Ability to work in a **fast-paced manufacturing environment** and manage multiple production tasks.
