**Project Management Executive**
Location: Dubai
Salary: Up to AED 6,000

**Industry:** Information Technology

## Job Brief:

We are seeking a detail-oriented and analytical Project Management Executive to support end-to-end project execution, forecasting, and financial monitoring within a leading technology environment. The role involves managing project activities in SAP, generating statistical forecasts, coordinating project lifecycles, and ensuring accurate budgeting, cost tracking, and revenue recognition.

The ideal candidate will have experience working with ERP systems, project coordination, business data analysis, and cross-functional teams while maintaining data integrity and meeting project deadlines. This Project Management Executive Job in Dubai is well-suited for professionals with strong analytical skills and a passion for driving operational excellence through effective project management.

## Job Responsibilities:

- Generate statistical forecasts using actual business data in SAP, evaluate forecast accuracy, and update final forecasts to support effective planning.

- Manage project activities in SAP, including project setup, legal reviews, contract approvals, purchase order creation, procurement processes, and customer billing.
- Coordinate project costs, profit margins, and timelines within the system to ensure materials, services, and deliverables are completed on schedule.
- Support sales achievement by tracking revenue and cost recognition while ensuring accurate and timely project execution in SAP.
- Oversee the complete project lifecycle from initiation to closure, ensuring every phase is properly executed and accurately recorded within the system.
- Liaise with subsidiaries to address ad hoc queries and provide timely responses, facilitating smooth contract processing and project execution.
- Monitor project budgets, financial performance, and forecasting data to support management decision-making.
- Collaborate with internal departments and external stakeholders to ensure seamless coordination throughout project execution.
- Prepare analytical reports, dashboards, and business insights using SAP, Excel, Power BI, or other reporting tools.
- Ensure data accuracy, compliance with internal procedures, and timely completion of project-related documentation.

## Job Requirements:

- Bachelor’s Degree in Business Administration, Finance, Information Technology, Engineering, or a related field.
- Proven experience handling project lifecycle activities, including budgeting, cost tracking, revenue recognition, and financial monitoring.

- Hands-on experience with ERP systems, preferably SAP, for project execution, forecasting, reporting, and analysis.
- Experience collaborating with multiple stakeholders, including internal teams, subsidiaries, and external partners, on project and contract-related matters.
- Strong analytical skills with experience in business data handling, statistical forecasting, and ad hoc reporting.
- Advanced proficiency in Microsoft Excel and Power BI or other data visualization tools.
- Excellent communication skills with the ability to translate technical information into meaningful business insights.
- Ability to work independently while collaborating effectively within cross-functional teams.
- Strong organizational skills with a focus on meeting deadlines and maintaining data integrity.
- Excellent attention to detail and problem-solving abilities.
