Proposal Manager
Location: Sharjah
Salary: AED 18,000 – 26,000

Industry: Water Treatment

Job Brief:

We are hiring for a Proposal Manager in Sharjah who will lead and manage the proposal and tendering function for EPC projects across Water & Wastewater Treatment, Oil & Gas, and Municipal sectors.

The ideal candidate will have over 15 years of experience in proposal development, strong leadership capabilities, and deep technical knowledge of water treatment processes, costing, estimation, and bid governance.

Job Responsibilities:

1. Leadership & Strategy

- Lead and manage the proposal and tendering function for EPC projects in Water & Wastewater Treatment, Oil & Gas, and Municipal sectors.
- Define and implement proposal strategies, governance frameworks, and best practices to maximize win probability and operational efficiency.
- Provide strategic input for bid/no-bid decisions, risk evaluation, and executive-level business planning.

- Drive process improvements, knowledge sharing, and adoption of standardized tools across global proposal operations.

2. Team & Resource Management

- Manage a cross-border team of proposal engineers based in the UAE and India, ensuring seamless collaboration and optimal resource utilization.
- Assign workloads, set priorities, and monitor progress across multiple proposals simultaneously.
- Mentor, coach, and develop team members to strengthen both technical and managerial capabilities.
- Conduct performance evaluations, define KPIs, and ensure continuous skill development across regional teams.
- Establish succession planning and training programs to support long-term team sustainability.

3. Proposal Development & Governance

- Oversee the preparation of technical and commercial proposals, ensuring alignment with client specifications, company policies, and compliance requirements.
- Review and approve process designs, PFDs, P&IDs, BOQs, cost estimates, and execution strategies.
- Implement standardized proposal templates, systems, and documentation practices to maintain consistency across teams.
- Ensure all proposals undergo proper internal reviews, approvals, and risk assessments prior to submission.

4. Cross-Functional & Stakeholder Collaboration

- Coordinate with engineering, procurement, design, finance, legal, and project management teams to integrate accurate inputs into proposals.
- Collaborate with business development and sales teams to align proposals with client objectives and market positioning.
- Represent the organization in client-facing presentations, technical clarifications, and commercial negotiations during pre-award stages.
- Build and maintain relationships with key clients, consultants, suppliers, and subcontractors to strengthen market competitiveness.

5. Performance Monitoring & Reporting

- Track bid pipeline, proposal performance, and win/loss ratios, and present detailed reports to senior management.
- Conduct post-bid analysis to capture lessons learned and drive continuous improvement initiatives.
- Benchmark team performance to ensure consistency, knowledge transfer, and operational efficiency.

Job Requirements:

- Minimum **15+ years** of experience in **technical proposal development.**
- At least **5+ years** of experience in a **managerial or leadership role.**
- **Mandatory experience in the water treatment industry.**
- Bachelor's degree in **Mechanical, Chemical, or Environmental Engineering.**
- Master's degree is preferred.

- Proficiency in MS Office and ERP systems.
- Strong experience in proposal and tender management.
- Expertise in technical and commercial bid development.
- In-depth knowledge of water and wastewater processes and EPC proposals.
- Strong experience in costing, estimation, and risk evaluation.
- Ability to review and validate P&IDs and BOQs.

Core Competencies:

- Strong cross-functional coordination and client management skills.
- Proven ability in team leadership and resource planning.
- Strategic thinking with strong competitive analysis capabilities.
- Strong understanding of proposal governance and documentation practices.
- Excellent communication and presentation skills (mandatory: English)
