Sales Engineer
Location: Dubai
Salary: AED 8,000 – 12,000

Industry: Steel Manufacturing

Job Brief:

A leading steel manufacturing company is seeking a dynamic Sales Engineer to join our team. The ideal candidate will have extensive experience in construction-related products or sectors, with a proven ability to build strong client relationships and deliver technical solutions that meet project requirements. We're seeking someone who combines **engineering expertise, commercial acumen, and excellent communication skills** to help drive our business forward.

Job Responsibilities:

- Build and maintain strong relationships with clients across the construction and steel industries.
- Conduct regular client meetings and project site visits to understand technical requirements and offer suitable solutions.
- Present and promote the company's range of steel products and services to clients and prospects.
- Prepare technical and commercial proposals, ensuring accuracy and alignment with client needs.
- Work closely with internal teams to ensure smooth project coordination and delivery.
- Track and analyze market developments, competitor activity, and customer needs to identify growth opportunities.
- Negotiate pricing, terms, and agreements to secure successful project awards.
- Provide post-sales follow-up to ensure client satisfaction and continued partnership.
- Maintain detailed records of sales activities, client communications, and project progress.

Job Requirements:

- Bachelor’s degree in Engineering (Civil preferred) or a related discipline.
- **2–4 years of experience in sales within the steel, construction, or related sectors.**
- Valid driving license is essential.
- Arabic language proficiency is an advantage.
- Strong communication, presentation, and negotiation skills.
- Proven ability to interpret technical requirements and convert them into business opportunities.
- Self-driven, results-oriented, and comfortable working independently.
- Willingness to travel locally for client meetings and site visits.
